LONDON: E. & F. N. SPON, 48, CHANCING CROSS.

# CATALOGUE.

## Aeronautics.

Practical Aeronautics, by G. G. M. Hardingham, C. & M. E., being a paper read in April, 1871, at a Supplemental Meeting of the Students of the Institution of Civil Engineers, and to which a Miller Prize was awarded, *plates*, 8vo, sewed

1 6

## Arches.

Table for Arches, by Frank Robertson, F.R. Astro. Soc., late first Lieut. Royal Engineers, etc., 8vo, cloth

3 6

## Architects' Handbook.

A Handbook of Formulæ, Rules, and Memoranda, for Architectural Surveyors and others engaged in Building, by J. T. Hurst, C.E., eighth edition, royal 32mo, roan

5 0

### CONTAINING :

Formulæ useful in Designing Builders' work.	Mensuration.
Memoranda connected with Builders' work.	Table of the Weight of Materials used in Building.
The Practice of Builders' Measurement.	Constants of Labour.
Summary of the Practice in Dilapidations.	Valuation of Property.
	Scale of Professional Charges for Architectural Surveyors, etc.

"It is no disparagement to the many excellent publications we refer to, to say that in our opinion this little pocket-book of Hurst's is the very best of them all, without any exception. It would be useless to attempt a recapitulation of the contents, for it appears to contain almost *everything* that anyone connected with building could require, and, best of all, made up in a compact form for carrying in the pocket, measuring only 5 in. by 3 in., and about  $\frac{1}{2}$  in. thick, in a limp cover. We congratulate the author on the success of his laborious and practically compiled little book, which has received unqualified and deserved praise from every professional person to whom we have shown it."—*The Dublin Builder*.

## Architecture.

The Ornamentation of the Transitional Period of British Architecture, by Edmund Sharpe, M.A., F.I.B.A., a series of Illustrations of the Carved Work of the Transitional Period, taken from the Pier Capitals, Doorways, and Arcades of the principal Churches of that Period, in the United Kingdom, in Three Numbers. No. 1, imperial 4to, sewed, 42 *lithographic plates*

21 0

## Architecture.

Four Letters on Colour in Churches, on Walls and in Windows, by Edmund Sharpe, M.A., F.I.B.A., second edition, 8vo, sewed

0 6  
B 2

### Architecture.

The Mouldings of the Six Periods of British Architecture from the Conquest to the Reformation, by Edmund Sharpe, M.A., F.I.B.A. These examples, taken full size, by unfailling methods, from the principal Cathedrals, Conventual, and Parish Churches of the Kingdom, have been carefully reduced, chiefly to one-third the size of the Originals, and are printed in colours. In the selection of the colours attached to the different Periods the same sequence has been adopted as that in which they occur in the Prismatic Spectrum; so that a given colour not only indicates the Period to which the Moulding belongs, but also the relative historical position of the Period itself. Thus: Black represents Norman, 1066 to 1145; blue represents Transitional, 1145 to 1190; green represents Lancet, 1190 to 1245; yellow represents Geometrical, 1245 to 1315; red represents Curvilinear, 1315 to 1360; crimson represents Rectilinear, 1360 to 1550. Nos. 1, 2, and 3, each containing 60 *plates*. Imperial 4to, sewed, each

21 0

"Mr. Sharpe's work may be described as presenting a large collection of mouldings in profile, under three heads:—Part I., Arched Mouldings; Part II., Horizontal Mouldings; Part III., Vertical Mouldings. It is the special purpose of the author, first to render these with perfect accuracy, to a scale generally of about one-third full-size; and, secondly, to arrange them in order of date, under the six 'Periods' which he has long made familiar to us, namely, Norman, Transitional, Lancet, Geometrical, Curvilinear, and Rectilinear,—this classification, moreover, being exhibited by distinctions of tinting, which are intended to emphasize the differences of character, although they amount to no more than the use of black, blue, green, yellow, red, and crimson, to indicate respectively the order of the Periods. There are many students of mediæval detail to whom this collection of genuine examples faithfully represented must prove of much interest, and indeed, of considerable practical service."—*Architect*, July 8, 1871.

### Architecture.

The First Excursion of the Architectural Association, an Account of the Lincolnshire Churches visited during the first Excursion of the Architectural Association in August, 1870, under the guidance of Edmund Sharpe, Esq., including the Architectural History of Lincoln Cathedral, and the following Parish Churches: St. Benedict, St. Mary-le-Wigford, and St. Peter Gowts, Lincoln, Caythorpe, Fulbeck, Leadenham, Welbourn, Wellingore, Navenby, Coleby, Harmston, Waddington, Canwick, Sleaford, Silk Willoughby, Swarby, Aswarby, Threkingham, Billingborough, Horbling, Osbournby, Swayton, Helpringham, Heckington, Asgarby, Kirkby-Lay, Thorpe, Sutton, Gedney, Fleet, Holbeach, Whapload, Moulton, Weston, and Spalding; 63 *lithographic plates and woodcuts*, super-royal 8vo, cloth

21 0

### Artificial Manure.

Agriculturists their own Superphosphate makers, with *illustrations*, by A. G. Lock, second edition, 8vo, sewed

1 0

**Architecture.**

The Seven Periods of English Architecture, by Edmund Sharpe, M.A., F.I.B.A., an Elementary Work, affording at a glance a comprehensive view of the History of English Architecture from the Heptarchy to the Reformation, second edition, 20 *steel engravings and woodcuts*, super-royal 8vo, cloth

15 0

**Blast-Furnace.**

Researches on the Action of the Blast-Furnace, by Charles Schinz, translated from the German by W. H. Maw, and Moritz Müller, *plates*, crown 8vo, cloth

8 6

**CONTENTS :**

Pyrometer.	Quantity of Iron contained in the Charges.
The Process of Combustion.	Carburization of the Iron.
Area of Contact.	Form of the Blast-Furnace.
Influence of the Temperature upon Combustion.	Analysis of the Gases in the Blast-Furnace.
Moisture in the Air.	On the Use of Limestone as a Flux.
Elevation of Temperature by the Pressure of the Blast.	Coke and Charcoal.
Elevation of Temperature by a Preliminary Heating of the Fuel.	The Proportion of Ashes in the Coke.
Quantity and intensity of the Heat.	Quantity of Air introduced into the Blast-Furnace.
Volumes of the Materials with which the Blast-Furnace is charged.	Cost of the Blast.
Specific Heats of the Materials with which Blast-Furnaces are charged.	On the Saving of Fuel effected by increasing the Pressure of the Blast.
Latent Heat.	Calculation of the Resistance of the Column of Fusion.
The Heat of Combination.	Conclusions derived from the preceding Chapters.
Chemical Decompositions affected by High Temperatures.	Process for partly Eliminating the Nitrogen in the Products of Combustion.
Resistance of the Column of Fusion.	The Production of Carbonic Oxide.
Transmission of the Heat through the Walls of the Furnace.	Utilization of the Gases of the Blast-Furnace.
Heat-conducting Powers of different Materials.	Application of the Partial Elimination of the Nitrogen.
Absorption of Heat by the Charges.	Description of a Blast-Furnace fitted with the necessary apparatus for the partial Elimination of the Nitrogen.
Means of Diminishing the Transmission of Heat.	The Transmission of Heat through the Walls of the Furnace.
The Reductometer.	The Reductibility of various Ores, and Influence of the Quantity and Quality of the Gases upon the Reduction.
Experiments on Reduction.	The Calculation, <i>à priori</i> , of the Effects of Different Methods of Working a Furnace.
Results of the Reductometric Observations.	The Influence of various Methods of Working upon Transmission, Consumption of Fuel, and Production, demonstrated by Means of a <i>priori</i> Calculation.
Zones of the Blast-Furnace.	
Volume of the Zone of Gasification.	
Calculation of the Temperatures in the Zone of Gasification.	
Calculation of the Volumes of the Zones of Fusion, Reduction, and Preparation.	
Auxiliary Means for Calculating the Transmission of the Walls of the Blast-Furnace.	
Time occupied by the Charges in passing through the Shaft of the Blast-Furnace.	

**Balance Spring.**

Prize Essay on the Balance Spring, and its Isochronal Adjustments (Baroness Burdett Coutts's Prize), *cuts*, crown 8vo, cloth

2 6

**Brewing.**

The Art of Brewing practically exemplified, with full Instructions to Brew from Malt, or in combination with Sugar, Ales, Stout, Porter, and India Pale Ales, by Daniel Dobell, 8vo, cloth

3 0

**Bricklayers' Tables.**

Builders' and Contractors' Tables, for the Use of Engineers, Architects, Surveyors, Builders, Contractors, Land Agents, and others, by Henry Laxton, C.E., Author of Examples of Building Construction, Builders' Price Book, Workman's Wages Tables, etc., 4to, cloth,

5 0

**Brick-making.**

Chemical and Geological Observations relating to Brick-making in Western India, by M. Walsh, 8vo, sewed

1 0

**Bridges.**

Long-Span Railway Bridges, comprising Investigations of the Comparative Theoretical and Practical Advantages of the various adopted or proposed Type Systems of Construction, with numerous Formulae and Tables giving the weight of Iron or Steel required in Bridges from 300 feet to the limiting Spans; to which are added similar Investigations and Tables relating to Short-Span Railway Bridges, second and revised edition, *plates*, crown 8vo, cloth

5 0

**Bridges.**

Wrought-Iron Bridges and Roofs. Lectures delivered at the Royal Engineer Establishment, Chatham, with examples of the Calculations of Stress in Girders and Roof Trusses, by Graphic and Algebraic Methods, by W. Cawthorne Unwin, B.S., Associate I.C.E., 8vo, cloth, with 13 *plates*

12 6

## CONTENTS :

- |   |  |
|---|--|
| Lecture 1.—On the Distribution of Stress in Beams.                    | Lecture 4.—On Braced Girders.                |
| 2.—On the Intensity of Stress in Bridges, and on Estimating the Load. | 5.—On Riveted and other Joints.              |
| 3.—On Plate Web Bridges.  | 6.—On Roofs.                                 |
|   | Appendix. Examples of Calculation of Stress. |

"The author has succeeded in bringing out a volume which will be a useful guide to all who are desirous of becoming acquainted with a branch of Engineering that is becoming more and more important every day."—*Engineer*.

"A careful perusal of Mr. Unwin's lectures will well repay our readers, whether students or experts."—*Engineering*.

**Bridges.**

Estimates and Diagrams of Railway Bridges for Turnpike, Public, and Occupation Roads, in the Embankments of Double or Single Lines, and Cuttings of Double Lines, with Form for Calculating Quantities in Skew Structures, etc., also Culverts of various dimensions, and at Station Buildings, by J. W. Grover, M.I.C.E., second edition, enlarged, *with 37 coloured plates*, folio, cloth

31 6

**Bridges.**

A Practical Treatise on Cast and Wrought Iron Bridges and Girders, as applied to Railway Structures and to Buildings generally, with numerous examples drawn to a large scale, selected from the Public Works of the most Eminent Engineers, *with 58 full-page plates*, by William Humber, Associate Institute Civil Engineers, and Member of the Institution of Mechanical Engineers, imp. 4to, half-bound in morocco

£2 2 0

**Bridges.**

The Strains upon Bridge Girders and Roof Trusses, including the Warren, Lattice, Trellis, Bowstring, and other Forms of Girders, the Curved Roof, and Simple and Compound Trusses, by Thos. Cargill, C.E.B.A.T., C.D., Assoc. Inst. C.E., Member of the Society of Engineers, *with 64 illustrations, drawn and worked out to scale*, 8vo, cloth

12 6

**Bridges.**

Construction of the Great Victoria Bridge, in Canada, by James Hodges, Engineer to Messrs. Peto, Brassey, and Betts, Contractors, vol. 1, imp. 4to, *illustrated with 17 coloured plates, and numerous wood engravings*; vol. 2, royal folio, *containing 28 double and 19 single plates*, together 2 vols., half-bound in morocco

£4 14 6

**Bridges.**

Memoir of the Niagara Falls and International Suspension Bridge, by J. Roebling, *with 22 plates*—The Paddock Viaduct, by J. Hawkshaw, 4 *plates*—The Denby Dale Viaduct, by J. Hawkshaw, 3 *plates*—Newark Dyke Bridge, by J. Cubitt, 10 *plates*—Mountain Top Tract in Virginia, by E. Ellet—Preliminaries to Good Building, by E. Garbett, etc., royal 8vo, cloth

12 6

**Bridges.**

Economics of Construction in relation to Framed Structures. Contents: Classification of Framed Structures or Trusses, Diagrams of Forces, with numerous examples, by Robert H. Bow, C.E., F.R.S.E., *illustrated by 332 diagrams of Roofs and Bridges and 16 plates*, 8vo, cloth

5 0

**Builders' Price-Book.**

Spsons' Builders' Pocket-Book of Prices and Memoranda, edited by W. Young, architect, royal 32mo, roan or cloth, vermilion edges  
Published annually.

4 6  
3 6

**CONTENTS :**

Ancient Lights, Table of and Rules for Calculating.	Nomenclature, Architectural.
Approximate Cost of Buildings, by Cubing.	Paviors' Memoranda.
Arches, Architects' Charges.	Perspective.
Bricklayers' Useful Memoranda.	Piers and Pillars.
Carpenters' and Joiners' Useful Memoranda.	Piles.
Cubical Contents of Floors, Roofs, etc., Table of.	Plasterers' Memoranda.
Cements, Composition and Strength of.	Plumbers' Memoranda.
Chimneys, How to Build.	Preservation of Wood and Stone.
Chimneys, Smoky, Cause and Cure of.	Rainfall.
Churches, Rules of Incorporated Society.	Retaining Walls.
Circle, Properties of.	Rolled Iron Joists.
Coals, Space occupied by, and Weight of.	Roofs, Table of Scantling, etc.
Columns, Strength of.	Ropes.
Cast Iron Hollow Columns, Table of.	Stone, Building, Component Parts, Colour, Weight, Strength, and Price of Building Stones in England and Scotland.
Concrete Building.	Surveying.
Concrete under Water.	Symbolism.
Corrugated Iron Roofing.	Thickness of Walls.
Damp Walls, Recipe for.	Tenacity of Materials.
Decay of Wood, Cause and Cure of.	Timbers, Quality, Weight, and Strength of.
Dimensions of English Cathedrals and Hall.	Valuation of Property.
Drainage of Land.	Ventilation.
Drains and Sewers.	Warming by Steam.
Drainage of Towns, Cost of.	Water, Hot.
Excavators' Useful Memoranda.	Water Supply.
Fire and Insurance Memoranda.	Waterworks.
Five Orders of Architecture.	Wells.
Floors and Joists, Table of Wood.	Weight of Metals and all Materials used in Building.
Footings of Walls.	Wind, Pressure of.
Gasfitters' Useful Memoranda.	Zinc-workers' Memoranda.
Gas Supply.	Excavators' Prices.
Girders of Wood and Iron, Strength of, and Table of Safe Loads.	Bricklayers' Prices.
Heat.	Masons' Prices.
Hoop Iron.	Marble Masons' Prices.
Heights, Measurable.	Terra-cotta Prices.
Iron Roofs, Examples of.	Paviors' Prices.
Lightning Conductors.	Carpenters' Prices.
Limestones.	Joiners' Prices.
Loads on Roofs and Floors.	Steam-made Joinery Prices.
Mensuration.	Ironmongers' Prices.
Measurement of Builders' Work.	Slaters' Memoranda.
Mortars.	Slaters' Prices.
Mortar, Smeaton's, as used at Eddy-stone Lighthouse.	Tilers' Prices.
Norman, Early English, Decorated, and Perpendicular Mouldings, Examples of.	Plasterers' Prices.
	Plumbers' Prices.
	Smiths' and Founders' Prices.
	Zinc-workers' and Bell-hangers' Prices.
	Painters' and Paper-hangers' Prices.
	Glaziers' Prices.

**Builders' Tables.**

Builders' and Contractors' Tables, for the use of Engineers, Architects, Surveyors, Builders, Contractors, Land Agents, etc., by Henry Laxton, C.E., containing 53 Tables, 4to, cloth

5 0

**Cabinet Making.**

The Cabinet Maker; being a Collection of the most approved designs in the Mediæval, Louis-Seize, and Old English styles, for the use of Cabinet Makers, Carvers, &c., by R. Charles, 96 plates, folio, half-bound

21 0

**CONTENTS:****Plate**

1. Louis-Seize Console Table, with 3-plate frame.
2. A ditto Chimney Glass.
3. An Oval ditto ditto
4. Louis-Seize Window Cornice and Draperies.
5. Dining Room ditto ditto
6. Ovolo Cabinet.
7. Ditto ditto, open ended.
- 8, 9. Sideboards.
10. Hat-stands.
11. { Interior Decoration (O. W.
12. { Davis.)
13. Pier Table.
- 14, 15. Window Cornices.
16. Sideboard.
17. Wardrobe.
18. Ditto
19. Bedstead.
20. Ditto
21. Dressing Table.
22. Washstand Pedestal and Towel-horses.
23. { Internal Decoration, "Black
24. { Horse," Rathbone Place (O. W. Davis.)
25. Sideboard (by E. Lorimer).
26. Dinner Waggon.
27. Dinner Table Legs (various).
28. Dining Room Chairs.
29. Arm Chairs (Tudor).
30. Dining Room Chair and Sofa.
31. Ditto ditto Chimney Glass.
32. Window Cornices.
33. Ditto ditto
34. Ditto ditto
35. { "Black Horse," Rathbone
36. { Place.
37. Old English Sideboard.
38. Wall Decoration.
39. Window Cornices.

**Plate**

40. Window Cornices.
- 41 to 47. Dining Room Chairs.
48. Chair Legs (various).
49. Judge's Chair.
50. Dining Room Glass Frame.
51. Window Poles.
- 52 to 56. Window Cornices.
57. Lounging Chairs.
58. Ornamental Panel.
59. { Ceiling Decoration (Dome).
60. {
61. Sideboard (Mediæval).
62. Expanding Dining Tables.
63. Dining Room Chairs (Mediæval).
64. Ditto ditto and Sofa.
65. Ditto ditto.
66. Glass Frame ditto ditto
- 67 to 72. Window Cornices (Mediæval).
73. Sideboard (Mediæval).
74. Dinner Waggon (Mediæval).
75. Ovolo-ended Side Table.
76. Sideboard (Mediæval).
77. Cabinet Bookcase (Mediæval).
78. Cabinet (ditto)
79. Writing Tables (ditto)
80. Dressing Table (ditto)
81. Washstand (ditto)
82. Bedstead (ditto)
83. Window Cornices (ditto)
84. Ditto ditto (ditto)
85. Sideboard (ditto)
86. Ditto (ditto)
87. Writing Table and Daveport, (Mediæval).
88. Chairs (various) (Mediæval).
89. Sideboard (Mediæval).
- 90, 91, 92. Bedsteads (ditto)
93. Cornices (ditto)
94. Med. Grec. Sideboard.
- 95, 96. Ditto ditto

## Carpentry.

Elementary Principles of Carpentry, by Thomas Tredgold, revised from the original edition, and partly re-written, by John Thomas Hurst, contained in 517 pages of letterpress, and *illustrated with 48 plates and 150 wood engravings*, crown 8vo, handsomely bound in cloth

18 o

Section I.—On the Equality and Distribution of Forces.  
 „ II.—Resistance of Timber.  
 „ III.—Construction of Floors.  
 „ IV.—Construction of Roofs.  
 „ V.—Construction of Domes and Cupolas.  
 „ VI.—Construction of Partitions.  
 „ VII.—Scaffolds, Staging, and Gantries.

Section VIII.—Construction of Centres for Bridges.  
 „ IX.—Coffer-dams, Shoring, and Strutting.  
 „ X.—Wooden Bridges and Viaducts.  
 „ XI.—Joints, Straps, and other Fastenings.  
 „ XII.—Timber.

“A considerable time having elapsed since the publication of the second edition of this work, which was the last that had been revised by the author, his death occurring soon after, a new edition that would embrace recent improvements and examples was much required. Our stock of knowledge regarding the strength of materials has been largely increased, owing to the labours of Hodgkinson, Kirkaldy, and others. The rapid development of the railway system throughout the world has contributed greatly to the introduction of new methods and to the multiplication of examples in the art of construction. More perfect and scientific appliances in the erection of large works have been substituted for the primitive methods used in the last generation. These have all tended more or less to tax the ability and knowledge of the carpenter. The opening up and development of the resources of new countries have introduced varieties of timber, many of them possessing useful properties, not the least of which is that of resisting the attack of sea-worms and insects—a cause of destruction that has hitherto been a source of much anxiety to the Profession.

“In order to adapt this work as far as possible to the requirements of the modern carpenter, it has been necessary to re-write the articles on Pillars, Bridges, and Timber; to add new sections on Coffer-Dams, Scaffolds, etc., and to revise the remainder of the work throughout. And for the more complete illustration of these subjects several new plates and woodcuts have been added.

“The Editor trusts that this edition will merit the confidence of the Profession as a book of reference, and afford at the same time valuable assistance to the student.”

## Chimney Pieces.

Designs for Chimney Pieces, by George Gordon Hosking, Fellow of the Royal Institute of British Architects, dedicated (by permission) to Alfred Waterhouse, Esq., F.R.I.B.A., in one vol. royal folio, *56 fine lithographic plates*, toned paper, interleaved, handsomely bound in cloth gilt, antique style, gilt edges

63 o

The want of a Book of Designs for Chimney Pieces of a new and thoroughly practical character has long been felt. In the present work will be found great variety, each design being accompanied by details, drawn to a scale of one quarter the full size.

**Chimneys.**

Designs for Factory, Furnace, and other tall Shafts, by R. Rawlinson, 24 *plates*, containing plans, elevations, and sections of tall Chimneys, folio, cloth £2 2 0

**Chimneys.**

A Practical Treatise on Chimneys; with a few remarks on Stoves, the Consumption of Smoke and Coal ventilation, etc., by C. F. Eckstein, post 8vo, cloth 1 6

**Civil Engineering.**

Engineering Notes, by Frank Robertson, F.R. Astron. Soc., late first Lieut. R.E., and Civil Engineer Public Works Department in India, 8vo, cloth 12 6

The object of this work is to supply an exhaustive digest of all that is known on each subject, so far as is necessary and sufficient for an Engineer in Practice.

**Coffee.**

The Coffee Planter of Ceylon, by William Sabonadière, with an Appendix containing various extracts and letters from other authority, bearing on the same subject, second edition, enlarged and revised, *illustrated by plates and wood engravings*, crown 8vo, cloth 7 6

**CONTENTS:**

Introductory Remarks.	Coffee-Pruning, by W. L.
Selection of Land, Soil, Elevation, &c.	Mr. Moir on Estate Expenditure.
Felling, Clearing, and Lopping.	Mr. George Wall's Letter on Manuring.
Nurseries.	Laborie's Description of a Pulper.
Lining, Holing, and Planting.	Letters on Pulpers, by "An Old File."
Roads and Drains.	Coffee Statistics.
Weeding.	Planters' Association, Report on
Topping, Pruning, and Handling.	Manuring.
Manuring, Trenching, &c.	Baron Liebig on "Sombrecorum."
Picking, Curing, and Dispatching Crop.	R. B. Tytler on "Sombrecorum."
Bungalows and Lines.	A. Crewell's Letter to Planters' Association.
Stores, Pulping House, and Barbecues.	Cattle Disease, and its Treatment.
Tools and Machinery.	Robert Simpson's Price List, and
The Enemies of the Coffee-tree.	Analysis of Manures.
The Malabar Cooly.	Districts and Number of Coffee Estates
Estimates.	in Ceylon.
Description of the Coffee-tree by	Revenue and Expenditure of Ceylon
Laborie.	from 1840 to 1869.
Extract from Laborie's Remarks on	Shipments of Ceylon Coffee from
Pruning.	1849 to 1869.
A Paper on Pruning, by a Member of	
the Planters' Association.	

"This is an admirable handbook for coffee cultivation in the island where it has been carried out most largely and profitably. The author has had twenty years' experience on the subject, and therefore his advice and instructions as to selection and clearing of land, nurseries, planting, manures, buildings, and harvesting and preparation of the berry may be followed with advantage. The plans and illustrations are interesting and useful. The estimates given for outlay and profits, expense and character of buildings, are of most reliable and practical character. Having ourselves published on the subject, and as one thoroughly acquainted with coffee planting, we can heartily recommend Mr. Sabonadière's book to all intending coffee planters."—*Journal of Applied Science*, March 1, 1871.

**Coffee and Chicory.**

Coffee and Chicory; the Culture, Chemical Composition, Preparation for Market, and Consumption, with simple tests for detecting adulteration, and practical hints for the Producer and Consumer, by P. L. Simmonds, F.S.S., author of 'The Commercial Products of the Vegetable Kingdom,' 'Dictionary of Products,' etc., etc., *illustrated by numerous wood engravings*, post 8vo, cloth

2 0

**Compensations.**

Compensations, a Text-book for Surveyors, in tabulated form, by Banister Fletcher, post 8vo, cloth

5 0

**CONTENTS :**

The varieties of damage for which claims may arise—various classes of property—points to be observed in surveys—notices to treat—nature of damage for which claims can and cannot be sustained—what property can be compulsorily taken—when entry on property can and cannot be compulsorily made—of goodwill and stock—and of the various legal methods of settlement of disputed claims—together with full and explicit instructions on the methods of valuing, and of making claims; with comments on cases arising under the Metropolis Local Management, and Metropolitan Buildings Acts; the whole given in a practical and comprehensive form, supplemented by a copious Appendix, containing many useful forms and precedents, and also Tables for the Valuation of Freeholds, Leaseholds, Reversions, and Life-Interests, derived from the best-approved and most recent sources, and illustrated by examples.

**Concrete.**

A Practical Treatise on Concrete, and How to Make It. With Observations on the Uses of Cements, Limes, and Mortars, by Henry Reid, C.E., *plates*, post 8vo, cloth

4 6

The preparation of Concrete is treated fully by Mr. Reid, who devotes distinct chapters to Lime Concretes, Concretes with compound Matrices, Roman Cement Concretes, and Concretes made with Portland Cements. Those chapters are followed by two respectively treating of Machinery for mixing Concretes and Mortars, and remarks on Building by Frames.

"Mr. Reid's book is an extremely useful one, and we recommend it to the attention of all—and they are a large class—interested in the use of Concrete."  
—*Engineering*.

**Cottages and Villas.**

Picturesque Architectural Studies and Practical Designs for Gate Lodges, Cottages, Cottage Hospitals, Villas, Vicarages, Country Residences, Schools, Village Churches, etc., by W. Young, of Exeter Hall, London, Architect, 50 *plates*, 4to, elegantly bound in cloth

£ 1 5 0

This work contains sketches of executed examples of picturesque buildings, and suggestive designs, treated in a picturesque style; and includes plans, elevations, and perspective views.

The aim of the Work is to show the Artistic in building united to practical planning and instruction, more by careful study of proportion and distribution of parts, than by undue elaboration of detail; in fact, to get the most picturesque and artistic effect in the simplest and least expensive manner.

The Plates are facsimiles of the author's own drawings, accompanied by ample letterpress description and estimates of the cost.

**Clockwork.**

The New and Complete Clock and Watchmaker's Manual, comprising descriptions of the various Gearing Escapements, and Compensations now in use in French, Swiss, and English Clocks and Watches, with an Appendix, containing a History of Clock and Watchmaking in America, by M. L. Booth, *numerous engravings*, post 8vo, cloth

6 6

**Cornish Pumping Engine.**

Illustrations of the Cornish, and Boulton and Watt Engines, erected at the East London Water-works, Old Ford, 8 *large folio plates*, engraved by Gladwin, from elaborate drawings made expressly by Mr. Wickstead, together with explanation of the plates, 4to, cloth

12 0

**LIST OF PLATES, CORNISH ENGINE :**

- |  |   |
|--|---|
| <p>1.—Side elevation of Engine, Pump, and stand pipe, with longitudinal section of the Engine-house.</p> <p>2.—Longitudinal section of the Engine, &amp;c., on an enlarged scale.</p> <p>3.—Plan of the Boiler-house and four Cylindrical Boilers, plan of the</p> | <p>Engine-house and Engine, with Pump and stand pipe, &amp;c.</p> <p>4.—Front elevation of the face of the Boilers, a cross-section of the four Boilers and the warming tube, showing the side and bottom flues, the bridge fire-bars, and flues to bottom flues, showing the end and main flues in cross-section, etc.</p> |

**Cotton Press.**

Cotton Baling Presses, with a description of the Accumulator Cotton Press, by Ewing Matheson, 8vo, sewed

1 0

**Cotton Cultivation.**

Cotton Cultivation in its various details, the Barrage of Great Rivers, and Instructions for Irrigating, Embanking, Draining, and Tilling Land in Tropical and other Countries possessing high thermometric temperatures, especially adapted to the improvement of the cultural soils of India, by Joseph Gibbs, Member Institute Civil Engineers, *with 5 plates*, crown 8vo, cloth

7 6

## Dictionary of Engineering.

Spens' Dictionary of Engineering, Civil, Mechanical, Military, and Naval, with technical terms in French, German, Italian, and Spanish, 3100 pp., and *nearly* 8000 *engravings*, in super-royal 8vo, in 8 divisions, cloth, 13s. 6d. each  
 Complete in 3 vols., cloth £5 5 0  
 Bound in a superior manner, half-morocco, top edge gilt, 3 vols. £6 12 0

### CONTAINING COMPLETE TREATISES ON

Agricultural Instruments, including Steam Ploughing and Steam Ploughing Apparatus.	Hydraulics and Hydraulic Machines.
Air-Pump.	Ice-making Machine.
Alloys (Metallic) employed in the Useful Arts.	Iron Manufacture.
Anemometers.	Iron-ship Building.
Boring and Sinking Artesian Wells.	Irrigation.
Barn Machinery.	Lifts, Hoists, and Elevators.
Battery.	Lights, Buoys, and Beacons.
Bells (Large), How to construct to sound any required note.	Locks and Lock Gates.
Belts and Belting.	Locomotive Engine.
Boilers, the Principles and Practice of Boiler Construction.	Machine Tools.
Bootmaking Machinery.	Marine Engine.
Boring and Blasting.	Materials of Construction.
Brake (Railway).	Mechanical Movements.
Brick-making.	Mills and Mill-work.
Bridges—Timber, Stone, and Iron.	Metalurgy.
Cables.	Ores.
Cements.	Paper Machinery.
Coal Mining.	Permanent Way.
Coolers and Refrigerators.	Piles and Pile-driving.
Cotton Machinery.	Pin-making Machine.
Damming.	Pipes.
Details of Engines.	Pumps and Pumping.
Docks and Harbours.	Railway Engineering.
Dynamometer.	Reservoirs.
Electro-Metallurgy.	Retaining Walls.
Engines, Varieties of.	Rivers.
Fan.	Roads.
Fire-arms.	Roofs.
Flax Machinery.	Rope-making.
Forging, Machinery for.	Scaffolding.
Founding and Casting.	Screw Engines.
Friction.	Silver.
Furnace.	Stationary Engines.
Gas, Manufacture of.	Stave and Cask Machinery.
Hand Tools.	Steel.
Haulage of Coal.	Sugar Machinery.
	Signals.
	Telegraph.
	Ventilating and Warming.
	Water-works.
	Wood-working Machinery.

## Draining.

Draining for Profit and Draining for Health, by George E. Waring, jun., *with numerous cuts*, post 8vo, cloth

**Dilapidations.**

Dilapidations, a Text-book for Architects and Surveyors, in tabulated form, by Banister Fletcher, Asso. Rl. Inst. Brit. Arch. (Author of Model Houses), showing who are liable for Dilapidations, and the extent of the liability of Lessors, Lessees, Tenants at will, Tenants by elegit, Statute, Merchant, or Staple Tenants in fee simple, Tenants in tail, Tenants for life, Tenants for years without impeachment of Waste, Mortgagor, Mortgagee in Possession, Yearly Tenants, Tenants in common, and joint Tenants, Rights of coparceners, also what are dilapidations and waste, and further fully instructs the surveyor how to take and value them, to which is added the duties of surveyors, with a table of legal cases, embracing the most recent, and illustrated throughout by examples drawn from the author's experience, and latest legal decisions, 12mo, cloth

5 0

**Dual Arithmetic.**

The Young Dual Arithmetician, or Dual Arithmetic; a New Art, designed for Elementary Instruction and the use of Schools; to which are added, Tables of ascending and descending Dual Logarithms, Dual Numbers, and corresponding Natural Numbers, by Oliver Byrne, formerly Professor of Mathematics, College for Civil Engineers, Author of 'Dual Arithmetic, a New Art;' 'The Art and Science of Dual Arithmetic;' 'Dual Arithmetic theoretically and practically applied to Plane and Spherical Trigonometry and the Doctrine of Angular Magnitudes and Functions;' etc., Inventor of the Art and Science of Dual Arithmetic; and the Calculus of Form, a New Mathematical Science, second edition, revised and corrected, 12mo, cloth

3 0

**Earthwork Tables.**

Tables for Computing the Contents of Earthwork in the Cuttings and Embankments of Railways, by W. Macgregor, royal 8vo, cloth

6 0

"It is a difficult matter to compute the amount of earthwork removed from cuttings and piled up into embankments for railways; owing to the unevenness of the surface of the ground, it is, in fact, impossible to obtain absolute accuracy, and all that can be done is to calculate as close to truth as practicable. For this purpose Mr. Macgregor has compiled these tables, which will give the approximate quantity, sometimes more and sometimes less. The tables are arranged for cuttings of 30 ft. base, with slopes varying from  $\frac{1}{4}$  to 1, to  $2\frac{1}{4}$  to 1, and for bases of 15 ft. to 36 ft. with slopes of  $1\frac{1}{2}$  to 1 or 2 to 1."—*English Mechanic*.

**Earthwork Tables.**

A General Sheet Table for facilitating the Calculation of Earthworks for Railways, Canals, etc., by F. Bashforth, M.A., on a large sheet

0 6

**Earthwork Tables.**

A General Table for facilitating the Calculation of Earthworks for Railways, Canals, etc., with a Table of Proportional Parts, by Francis Bashforth, M.A., Fellow of St. John's College, Cambridge, in 8vo, cloth, with mahogany slide

4 0

"This little volume should become the handbook of every person whose duties require even occasional calculations of this nature: were it only that it is more extensively applicable than any other in existence, we could cordially recommend it to our readers; but when they learn that the use of it involves only half the labour of all other tables constituted for the same purpose, we offer the strongest of all recommendations—that founded on the value of time."  
—*Mechanic's Magazine*.

**Earthwork Tables.**

Tables for facilitating the Calculating of Earthwork in the Cuttings and Embankments of Railways, Canals, etc., second edition, corrected and considerably enlarged, by Sir John MacNeil, 8vo, cloth

31 6

**Earthwork Tables.**

Tables for facilitating the Calculation of Earthworks in the Construction of Railways, Roads, Canals, Dams, etc., by David Cunningham, C.E., royal 8vo, cloth

10 6

"A complete set of Earthwork Tables has been hitherto wanted among engineering works. This desideratum has just been supplied by Mr. Cunningham. The accuracy of the rough tables, or rather formulæ, in general use among engineers, has been repeatedly called in question, and the authors of the different systems in use carry on, or used to carry on, long controversies regarding the merits and demerits of their works. Of all the Tables extant, those of Mr. Bidder and Sir John MacNeil are most in favour with their fellow-engineers. But each of these has a fault. That of the former is that it is too condensed, and that of the latter engineer arises from its unwieldy expansion. The happy medium, has, we believe, been obtained in the present work. . . . Ample instructions are given for the use of every part of the book, which is certainly a most compact and useful work."—*Railway News*.

**Electric Telegraph.**

Electrical Tables and Formulæ for the Use of Telegraph Inspectors and Operators, compiled by Latimer Clark and Robert Sabine, with wood engravings, crown 8vo, cloth

12 6

**Electricity.**

Memorials, Scientific and Literary, of Andrew Crosse, the Electrician, 12mo, cloth

3 6

**Electrical Standards.**

Reports of the Committee on Electrical Standards appointed by the British Association, revised by Sir W. Thomson, Dr. J. P. Joule, Professors Clerk Maxwell, and Flemin Jenkin, with a Report to the Royal Society on Units of Electrical Resistance, by Prof. F. Jenkin, edited by Professor Flemin Jenkin, F.R.S., plates, 8vo, cloth

9 0

**Electric Telegraph.**

An Elementary Treatise on Electrical Measurement, for the Use of Telegraph Inspectors and Operators, by Latimer Clark, with numerous woodcuts, crown 8vo, cloth

6 0

**CONTENTS :**

Electrical Resistance.	To determine the Electro-motive
Electromotive Force.	Force of a Battery.
Electrical Tension or Potential.	To ascertain the Locality of Faults.
Electrical Induction.	Method of taking the Loop Test.
Electrical Quantity.	On Shunts and Derived Circuits.
Earth Connections.	Measurement by the Electrical Balance.
Units of Measurement.	Measurement of Gutta-Percha Cables,
Clark's Double-Shunt Differential Galvanometer.	Tables, Formulæ, etc., etc.
Measurements of Resistances.	

"As a pocket-book for Electricians it is very valuable."—*Engineering*.

"It is not easy to conceive it possible that a more satisfactory book than this could be produced."

"To all who are desirous of acquainting themselves with the laws of electrical currents in their applications to telegraphy, we cordially recommend this excellent elementary treatise."—*Athenæum*.

"It should be in the hands of every person who desires to keep pace with the rapid progress of modern electrical science."—*New York Telegrapher*.

**Electricity.**

A Treatise on the Principles of Electrical Accumulation and Conduction, by F. C. Webb, Associate Institute Civil Engineers, Part I., crown 8vo, cloth

3 6

**Embanking.**

Tables for setting out Half-Widths on Railways, Roads, Canals, and other Public Works, to be applied in Field Work, and without any previous Calculations, by J. S. Oliver, Civil Engineer, 12mo, cloth

4 0

**Engineer Officers' Navy List.**

The Engineer Officers' Navy List, and Handbook of Information, for the Steam Branch of the Royal Navy, published quarterly, post 8vo, sewed

1 6

**Engineering Drawing.**

An Elementary Treatise on Orthographic Projection, being a new method of Teaching the Science of Mechanical and Engineering Drawing, intended for the instruction of Engineers, Architects, Builders, Smiths, Masons, and Bricklayers, and for the use of Schools, with numerous illustrations on wood and steel, by William Binns, Associate Institute Civil Engineers, late Master of the Mechanical Drawing Class at the Department of Science and Art, and at the School of Mines, formerly Professor of Applied Mechanics, at the College for Civil Engineers, &c., sixth edition, 8vo, cloth

9 0

*Mr. Binns' system of Mechanical Drawing is in successful operation in all the Art Schools of the United Kingdom.*

C

### Engineering Drawing.

Lithographs of Machine Construction and Dr and Building Construction, comprising Plans, I tions, and Sections of all those details of constr specified in the Syllabus of the Science Dire subjects 2 and 3, drawn to a large scale, sh clearly how work is put together in order to students to pass the Government Examination W. Busbridge, price each sheet

### Engineering Drawing.

The Second Course of Orthographic Projection ; a continuation of the New Method of Teachin Science of Mechanical and Engineering Draw with some Practical Remarks on the Teeth of W the Projection of Shadows, Principles of Shading the Practice of Making to Scale Drawings from A Machinery. Intended for the Instruction of Engi Architects, Builders, Smiths, Masons, and Brickl and for the use of Science Schools and Classes, *numerous illustrations*, by William Binns, Cons Engineer, Associate I.C.E., late Master of the M nical Drawing Class at the Department of Science Art, and at the Royal School of Mines ; formerly fessor of Applied Mechanics at the College for Engineers, etc., 8vo, cloth

"Mr. Binns' Treatise is one which we can decidedly recomm ing students, and is, moreover, one which will be of service advanced engineers. In conclusion, also, it is only fair to the we should state that the book—which is illustrated by twenty-fo plates, and nearly seventy wood engravings—is got up in a style."—*Engineering*.

### Engineering Drawing.

Portfolio of Engineering Engravings, or a Dra Book of Engineering and Mechanics, being a s of practical examples in Civil, Hydraulic, and Me nical Engineering, 50 *plates*, with explanatory dc and sectional parts, etc., 4to, cloth

### Engineers' Common-Place Book.

The Engineers' Common-Place Book of Pract Reference, consisting of Rules and Tables famili adapted to Factory and Marine Steam Engines which are added, extensive tables of circumfere squares, cubes, areas of circles, superficies, and so ties of spheres, etc., for facilitating fractional calc tion, etc., by William Templeton, sixth edition, *pl* 12mo, cloth

### Engineers' Manual.

The Engineers' Manual of the Local Marine Bo Examinations, for certificates of competency as sec and first class Engineers, *with upwards of 100 il trated diagrams*, by Thomas L. Ainsley, fifth editi 8vo, cloth

**Engineers' Companion.**

The Office and Cabin Companion for Engineers and Officers of Steam Vessels, consisting of observations, rules, and tables to facilitate such Calculations as Naval Officers and Engineers are called upon to make, by J. Simond Holland, second edition, 12mo, cloth

3 0

**CONTENTS :**

The work and speed of Steam Engines, and Steam Ships, the relation between the power and speed of steam vessels, on finding the true mean speed of a steam vessel from a number of runs over the measured knot, knot and mile tables, theoretical horse-power, to find the centre of pressure in a paddle float, the slip and the resistance, hyperbolic logarithms, funnels, table for finding the surfaces of tubes, table of logarithmic factors for finding the constant logarithms of engines, with two equal cylinders, table of areas of small circles, useful for very small orifices, and fine wires, table giving the areas in square feet from lengths and breadths in feet and inches, table of superficies, wrought iron, cast iron, and steel-screw propeller, French horse-power, boilers, useful numbers and facts, etc.

**Engineers' Pocket-Book.**

The Pocket-Book of Pocket-Books, being Molesworth and Hurst's Pocket-Books, printed on thin paper and bound together in one volume, royal 32mo, russia, gilt edges

12 6

**Engineers' Price-Book.**

Appleby's Illustrated Handbook of Machinery and Iron Work, with the Cost, the Working Expenses, and the Results obtained in the use of Steam and Hand Cranes, Pumps, Fixed and Portable Steam Engines, and various other Machines ; with Weight, Measurement, etc., etc. ; also Prices of Tools, Iron Works, Stores, and Materials required by Civil and Mechanical Engineers, Merchants, and others ; together with numerous Tables and Memoranda, by Appleby Bros., Engineers, *many hundred wood engravings*, 8vo, cloth

12 6

"We have here a handsomely published volume of some 450 pages. It contains between three and four hundred wood engravings, and the prices of at least two thousand machines and miscellaneous articles. The first section is devoted to drawings and prices of steam cranes, travellers, winches, and steam hoisting machinery ; the second to engines, boilers, turbines, and dredgers ; the third to steam and hand pumps, hydraulic machinery, motors, and fittings ; the fourth to contractors' plant ; the fifth to machine tools, and the sixth principally to agricultural implements.

"Added is a small collection of tables, memoranda, and information for engineers. But as a price-book of general machinery Appleby's handbook is more complete than any which has yet come under our notice."—*Engineering*.

**Equations.**

General Method of Solving Equations of all Degrees ; applied particularly to Equations of the second, third, fourth, and fifth degrees, by Oliver Byrne, 8vo, sewed

1 0

C 2

**Engineers' Tables.**

Spons' Tables and Memoranda for Engineers, selected and arranged by J. T. Hurst, C.E., Author of 'Architectural Surveyors' Handbook,' 'Hurst's Tredgold's Carpentry, etc., 64mo, roan, gilt edges

I O

CONTENTS :		
EXCAVATORS' MEMORANDA	Weight of Hoop Iron	PAINTERS' AND GLAZIERS' MEMORANDA
BRICKLAYERS' Fire-Clay Flue Linings	" Chains, and size of Cast Iron Pipe	SUNDRY MEMORANDA
Weight of Bricks and Tiles	" Heads, Nuts, and Washers	Weight of Metals per foot cube
MASONS' MEMORANDA	" Cast Iron Socket Pipes	" Earth, Stone, &c. per ft. cube
Weight of Limes and Cements	" Wire	" Timber
" Purbeck Paving	Size and Weight of Nails per M	" Liquids
" Yorkshire Marble Slabs	" Spikes	" Men and Animals
SLATERS' MEMORANDA	Weight of Cast Iron Balls	" Forage
Weight of Slates	" Corrugated Iron	" Water
CARPENTERS' MEMORANDA	" Roofing	" Coal
Deal Standards	" Nails	Ropes
Purlins	" Shoes for Door Frames	Railway Curves
Roof Scantlings	Relative Weight of various Metals	Measurement of Heights
Floors	Proportion of Wheels	Railway Road Crossings
Railers	Cast Iron Pillars	Measurement of Distances
PLASTERERS' MEMORANDA	Relative Strength of Cast and Wrought Iron Pillars	MENSURATION
SMITHS' & FOUNDERS' MEMORANDA	Safe Load for Stone Pillars	Circumferences of Circles
Size of Heads, Nuts, &c.	" Floors	Areas of Circles
Rivets	Strength of Rolled Iron Beams	Regular Polygons
Shrinkage of Castings	Fire-Proof Floors	MONEY TABLES, English and Foreign
Corrugated Iron	Wrought Iron Roofs	WEIGHTS AND MEASURES
Zinc	PLUMBERS' MEMORANDA	Weight and size of casks
Weight of Round and Square Iron	Weight of Sheet Lead	Size of Paper
" Flat Bar Iron	" Lead Pipes	French Measures
" Round Cast Iron		Maltese
" Various Metals per ft. sup.		Comparison of English and Foreign Measures
" Sheet Iron		

This work is printed in a pearl type, and is so small, measuring only  $2\frac{1}{2}$  in. by 2 in., by  $\frac{1}{4}$  in. thick, that it may be easily carried in the waistcoat pocket. "It is certainly an extremely rare thing for a reviewer to be called upon to notice a volume measuring but  $2\frac{1}{2}$  in. by  $1\frac{1}{2}$  in., yet these dimensions faithfully represent the size of the handy little book before us. The volume—which contains 118 printed pages besides a few blank pages for memoranda—is, in fact, a true-pocket book, adapted for being carried in the waistcoat pocket, and containing a far greater amount and variety of information than most people would imagine could be compressed into so small a space. . . . The little volume has been compiled with considerable care and judgment, and we can cordially recommend it to our readers as a useful little pocket companion." —*Engineering*.

**Exchange Table.**

Universal Table of Exchange, for comparing the Coins of all Nations with one another in a simple and easy manner, by H. Filipowski, Actuary, 8vo, sewed

I O

**Engineers' Pocket-Book.**

A Pocket-Book of Useful Formulæ and Memoranda for Civil and Mechanical Engineers, by Guilford L. Molesworth, Member of the Institution of Civil Engineers, Consulting Engineer to the Government of India for State Railways, seventeenth edition, revised, with considerable additions by the author, containing one hundred and fifty additional pages, royal 32mo, roan

6 O

Ditto, Interleaved with ruled Paper for Office use

9 O

## SYNOPSIS OF CONTENTS.

Surveying, Levelling, etc.	Steam and the Steam Engine.
Strength and Weight of Materials.	Water-power, Water-wheels, Turbines, etc.
Earthwork, Brickwork, Masonry, Arches, etc.	Wind and Windmills.
Struts, Columns, Beams, and Trusses.	Steam Navigation, Ship - Building, Tonnage, etc.
Flooring, Roofing, and Roof Trusses.	Gunnery, Projectiles, etc.
Girders, Bridges, etc.	Weights, Measures, and Money.
Railways and Roads.	Trigonometry, Conic Sections, and Curves.
Hydraulic Formulae.	Mensuration.
Canals, Sewers, Water-works, Docks.	Tables of Areas and Circumference, and Arcs of Circles.
Irrigation and Breakwaters.	Logarithms, Square and Cube Roots, Powers.
Gas, Ventilation, and Warming.	Reciprocals, etc.
Heat, Light, and Colour.	Useful Numbers.
Gravity—Centres, Forces, and Powers.	
Millwork, Teeth of Wheels, Shafting, etc.	
Workshop Recipes.	
Sundry Machinery.	

"Most of our readers are already acquainted with Molesworth's pocket-book, and not a few, we imagine, are indebted to it for valuable information, or for refreshers of the memory. The book has been re-arranged, the supplemental formulæ and tables added since the first issue, having now been incorporated with the body of the book in their proper positions, the whole making over four hundred pages of a handy size for the pocket. Every care has been taken to ensure correctness, both clerically and typographically, and the book is an indispensable *vade-mecum* for the mechanic and the professional man."—*English Mechanic*.

**French-English Dictionary.**

Nouveau Dictionnaire portatif Anglais-Français et Français-Anglais, contenant outre un très-grand nombre de mots qui ne se trouvent pas dans les autres Dictionnaires, un Appendice contenant un Dictionnaire Anglais-Français et Français-Anglais des principaux termes techniques ayant rapport aux Sciences et aux Arts, à la Chimie, à la Physique, à l'Astronomie, à la Marine, à l'Art Militaire, à la Mécanique, aux Machines Locomotives, Chemins de Fer, Bateaux à Vapeur, aux Métiers, etc., par Percy Sadler, 2 vols. in 1, post 8vo, sewed 6s. : half-bound calf

7 6

**French Measures.**

French Measures and English Equivalents, by John Brook. For the use of Engineers, Manufacturers of Iron, Draughtsmen, etc., 18mo, roan

1 0

"In a series of compact tables the English values of the French measures are arranged from one to a thousand millimetres, and from one to a hundred metres; the fractions of an inch progressing in sixteenths are also reduced to French values. The little book will be found useful to almost every engineer."—*Engineering*.

**French-Polishing.**

The French-Polisher's Manual, by a French-Polisher, containing Timber Staining, Washing, Matching, Improving, Painting, Imitations, Directions for Staining, Sizing, Embodying, Smoothing, Spirit Varnishing French - Polishing, Directions for Repolishing, royal 32mo, sewed

0 6

**Gas.**

Analysis, Technical Valuation, Purification and Use of Coal Gas, by the Rev. W. R. Bowditch, M.A., *with wood engravings*, 8vo, cloth

12 6

Condensation of Gas—Purification of Gas—Light—Measuring—Place of Testing Gas—Test Candles—The Standard for Measuring Gas-light—Test Burners—Testing Gas for Sulphur—Testing Gas for Ammonia—Condensation by Bromine—Gravimetric method of taking Specific Gravity of Gas—Carbureting or Naphthalizing Gas—Acetylene—Explosions of Gas—Gnawing of Gas-pipes by Rats—Pressure as related to Public Lighting, etc.

"While the Gas Question is claiming the attention of the inhabitants of London and many of the large provincial towns, Mr. Bowditch's book must prove useful. The whole subject of the production, purification, and use of Gas, is treated in a perfectly exact, yet at the same time in a clear and concise manner. The Gas manager will find in its pages a careful examination by a man of science and great experience of all the methods which have been introduced for removing the non-illuminating and offensive principles from Coal Gas. The use of the Photometer in all its varieties is described, etc., with an important chapter on testing Gas."—*Athenaeum*.

**Gas.**

The Gas Fitter's Guide, showing the Principles and Practice of Lighting with Coal Gas, by James Mason, second edition, *cuts*, post 8vo, sewed

1 0

**Gas.**

The Gas Works of London, by Zerah Colburn, C.E., Member Institute Civil Engineers, etc., crown 8vo, boards

1 6

## CONTENTS:

Sketch of the Gas-works of London, Process of Manufacture, Quantity produced, and Cost, Profits, etc.

**Gas.**

How to Manage Gas, by F. Wilkins, C.E., second edition, 12mo, sewed

0 6

**Gas.**

Coal Gas, its History, Application, and Economical Use, by Joshua Kidd, Gas Engineer, *cuts*, 12mo, sewed

0 6

**Gunner's Pocket-Book.**

Bridges' Gunner's Pocket-Book, compiled by Captain T. W. Bridges, H.P. Royal Artillery, crown 32mo, roan, 1s.; or morocco

1 6

"Now-a-days nearly every profession has its special 'pocket-book,' and why not the artillery? So thought Capt. Bridges: hence this little book, which originated in a few tablets he was in the habit of carrying in his pouch, and which, amended and enlarged, he has now published in a waistcoat-pocket form, consisting of more than sixty pages of useful information to the gunner, whether volunteer or regular. Here we find rules for finding the distance of hostile batteries, and tables giving the range of guns for various degrees of elevation; the drills for the different service guns, and various other items, from the rations for horses to the trumpet-call for the soldier's mess."—*English Mechanic*.

**Gunnery.**

Tables of Remaining Velocity, Time of Flight, and Energy of various Projectiles, calculated from the results of experiments made with the Bashforth Chronograph, 1865-1870, 8vo, sewed

2 6

**Hat-Making.**

A Treatise on Hat-Making and Felting, including a full Exposition of the Singular Properties of Fur, Wool, and Hair, by John Thomson (a practical Hatter), *cuts*, 8vo, cloth 3 6

**Hot-Houses.**

A Practical Treatise on the Construction, Heating, and Ventilating of Hot-Houses, including Conservatories, Green-Houses, Graperies, and other kinds of Horticultural Structures, with practical directions for their Management in regard to Light, Heat, and Air, by Robt. B. Leuchars, *numerous illustrations*, crown 8vo, cloth 7 6

**Heat.**

A Practical Treatise on Heat, giving Data, Rules, and Tables to facilitate the practical application of the Laws of Heat to the Useful Arts; illustrated by examples worked out in detail for the use of Engineers, Architects, etc., by Thomas Box, Author of 'Practical Hydraulics,' *numerous plates*, post 8vo, cloth 8 6

## SYNOPSIS OF CONTENTS.

Chapter 1. General principles and facts in the theory of Heat. Ch. 2. Combustion. Ch. 3. Steam Boilers. Ch. 4. Efflux of Air. Ch. 5. Chimneys. Ch. 6. Vapour. Ch. 7. Evaporation. Ch. 8. Distillation. Ch. 9. Drying. Ch. 10. Heating Liquids. Ch. 11. Heating Air. Ch. 12. The transmission of Heat and laws of Cooling. Ch. 13. Laws of Cooling at High Temperatures. Ch. 14. Transmission of Heat by Conduction. Ch. 15. Ventilation. Ch. 16. Examples of Heating and Ventilation. Ch. 17. Wind, and its effects on Ventilation, etc., etc.

"We believe that it would be impossible to convey the same amount of practical information in a less space than Mr. Box has done, and in an engineering manual intended for constant reference, this concentration of facts, as we term it, is a most valuable feature. At the same time clearness has in no case been sacrificed to compactness, and the work bears throughout ample evidence of every division having been treated with a conscientious 'thoroughness' on the part of the author, which deserves high praise."—*Engineering*.

**Hydraulics.**

Manual of Hydrology, containing Hydraulic and other Tables, rivers, flow of water, springs, wells, and percolation, tides, estuaries and tidal rivers, rainfall, and evaporation, by Nathaniel Beardmore, C.E., *plates*, 8vo, cloth 24 0

**Hydraulics.**

Lowell Hydraulic Experiments; being a Selection from Experiments on Hydraulic Motors, on the flow of Water over Weirs, in open Canals, of uniform Rectangular Sections, and through Submerged Orifices and Diverging Tubes, made at Lowell, Massachusetts, by James B. Francis, Civil Engineer, second edition, revised and enlarged, with many New Experiments, and Additional Illustrations, *plates*, 4to, cloth £3 3 0

## Hydraulics of Great Rivers.

Observations and Surveys on the Largest Rivers  
World, by J. J. Révy, Civil Engineer, one vol.  
imp. 4to, cloth, with *eight large plates and charts*

### CONTENTS:

#### CHAPTER I.

GENERAL OBSERVATIONS: the Paraná, the Uruguay, an Estuary. Ordinary mode of Proceeding; Fall of Rivers; Fluvial single and double; Formule of great Mathematicians; Coefficienting Formule; Accurate Section of Great Rivers readily of Observations difficult; Floats deserve no confidence. The Surveys.

#### CHAPTER II.

MODE OF SURVEY ADOPTED: Detailed description. S Rosario Section; Instruments. *Currents*: Special App Meter; Improvements; Difficulties of great Depth; Designing; Current Integrator; Correct Observations practicable Accuracy.

#### CHAPTER III.

##### THE LA PLATA.

ESTUARY: Dimensions, Width, Depth, Channels; Changes; tion of Banks, Islands, Channels. *Tides*: Wave of the South. Disturbances; Diagrams; Contention between Great Rivers *Current Observations*: Current Curve; Currents at various Current: Integrator; Results; Check Trials; Summary of variety of Currents. *Inclination*: Estuary; Tidal Wave; from during Low Water; Interference of Rivers.

#### CHAPTER IV.

##### THE PARANA DE LAS PALMAS.

THE RIVER: Charts, Delta, Navigation, Embouchure. *Sections*: Currents; Mean, Surface, Bottom; Night and Day Rise and Fall at Section; Results of Currents; Soundings; of *Tides*: Diagrams of Systems of Waves; True Outline Dimensions. *Analysis of Inclination*: Measure of Power of and Imaginary Inclination; Effect of Tributaries; *Analysis of Currents*: Current Curve; Velocity at Surface below; Maximum Current; Mean Current; Correspond Bottom Currents; Current Curve across Section.

#### CHAPTER V.

##### THE PARANA.

THE RIVER: Expedition up River; Navigation; Channel Scenery; Laguna of San Pedro; Rosario; Punta Gorda: mences here; Formation of the Plains of South America; Darwin's Opinion; Pampas Deposit; Formation of Tosca Reefs; Paraná; La Paz; Esquina; Alexandra Colony; C and Drainage Area of River. *The Rosario Section*: *Current Observations*: Section of River; its Outline reproduced by C Currents in 13½ seconds' time; Surface Currents of Uruguay responding Depths in 5½ seconds; the Law governing S Effective Inclination. *Analysis of Depth and Surface Currents*: *Inclination*: Inclination of Paraná and of Palmas; Grad Channel of Paraná at Section on a slight bend; determine *Analysis of Section*: Channel Depth, Sectional Areas; C Movement of River; Flood Volume; Exceptional Rises.

## CHAPTER VI.

## THE URUGUAY.

FROM RIVER TO RIVER: the Pavon Channel; the Ibicuy River; Dimensions; Currents. *The River*: the Lake its Estuary; Delta; Turbidity of Paraná and Uruguay waters; Port of Salto; Navigation; the Falls; Extraordinary Fluctuations of River; Periodical Rises; Floods; Low Water; Drainage Area. *Salto Section*: Currents; Tables; Dimensions of River; Sectional Areas. *Analysis of Currents*: Surface Movement of River. *Analysis of Inclination*: River's Inclination  $5\frac{1}{2}$  times that of the Paraná; Fall during Periodical Rises. *Centres of Gravity*: Close Agreement of Centres of Section and of Currents; their Position.

## APPENDIX.

*The improved Current Meter* and its Application; Description; Details; Modes of Observation at Fixed Levels; Integration of Currents; Trials to determine Values of Equation; Algebraic expression; Examples; Geometrical Solution of Problems.

**Hydraulics.**

Description of the Differential Expansive Pumping Engine, with useful notes by Henry Davey, C.E., *plates*, royal 8vo, sewed

I 6

**Hydraulics.**

Practical Hydraulics: a Series of Rules and Tables for the use of Engineers, etc., etc., by Thomas Box, third edition, *numerous plates*, post 8vo, cloth

5 0

## CONTENTS:

Tables and Formulæ of the Theoretical Discharge of Water by round apertures of various diameters, and under different heads of water pressure.	Of the heights of Jets with different heads.
Of the Actual Discharge of short Tubes of various diameters, with square edges, and under different heads of water pressure, being 8-10ths of the theoretical discharge.	Of the discharge of Jets with different heads.
For bends in Water pipes, showing the loss of head due to change of direction by one bend of 90°. For quick bends.	Of the Discharge of Water over Weirs.
	Of the Discharge of Overflow Pipes for Tanks, etc. For open Channels, Canals, and Rivers. For the Discharge of ditto.
	Of the strength of Water Pipes.
	Etc. etc. etc.

**Hydraulics.**

Tredgold's Tracts on Hydraulics, containing Smeaton's Experimental Papers on the power of Water and Wind to turn Mills, etc., Venturi's Experiments on the Motion of Fluids, and Dr. Young's Summary of Practical Hydraulics, *plates*, royal 8vo, boards

6 0

**Hydraulic Engineering.**

Prize Essay on the Encroachment of the Sea between the River Mersey and the Bristol Channel, being an Essay which obtained the Prize of the National Fistedfodd, held at Chester, 1866; by J. E. Thomas, 8vo, sewed

I 0

**Hydraulic Presses.**

Experiments on the Friction of the Leather Collars in Hydraulic Presses; conducted by John Hick, C.E., *plate*, 8vo, sewed

1 0

**Hydraulic Tables.**

Office Hydraulic Tables, for the use of Engineers engaged in Water-works, giving the Discharge and Dimensions of Rivers, Channels, and Pipes, by J. Neville, on a large folio sheet

1 0

**Illumination.**

Handbook of Alphabets, in three parts. Part 1, Illuminated initial letters from the 6th to the 18th century, containing 363 examples. Part 2, Manuscript, missal, and ornamental alphabets, from the Christian era to the 17th century, comprising 155 examples. Part 3, plain and ornamental alphabets, with 36 examples, the whole *printed in gold and colours*, in one vol., royal 8vo, oblong, bound in cloth

12 6

**Indicator.**

The Indicator Diagram Practically Considered, by N. P. Burgh, Engineer, *numerous illustrations*, second edition, crown 8vo, cloth

6 6

"This volume possesses one feature which renders it almost unique; this feature is the mode in which it is illustrated. It is not difficult to take a diagram if the instrument is once set, and the setting with stationary engines is occasionally easy enough, but circumstances continually arise under which the young engineer is completely at a loss as to how to obtain a diagram. All uncertainty will be removed by referring to the book under consideration; here we have drawings of the arrangements to be adopted under every conceivable circumstance, drawings, we may add, illustrating the practice of the best engineers of the day."—*Engineer*.

**Indian Engineering.**

Roads, Railways, and Canals for India, with practical suggestions, by T. Login, Esq., C.E., F.R.S.E., Exec. Engineer, 7th Division Grand Trunk Canal, formerly Superintendent Northern Division, Ganges Canal, royal 8vo, sewed

1 0

**Inventors and Inventions.**

Inventors and Inventions, in 3 parts. 1st, The philosophy of Invention considered strictly in relation to ingenious contrivances tending to facilitate scientific operations, to extend manufacturing skill, or to originate new sources of industry. 2nd, The rights and wrongs of Inventors, particularly as affected by the influence of patent monopoly, legally and politically examined. 3rd, Early Inventors' Inventories of Secret Inventions employed from the thirteenth to the seventeenth century in substitution of Letters Patent, by Henry Dirks, C.E., F.C.S., etc., *with portrait of the author*, crown 8vo, cloth

4 0

**Indian Engineering.**

India and Indian Engineering, three Lectures delivered at the Royal Engineer Institute, Chatham, in July, 1872, by Julius George Medley, Lieut.-Col. R.E., Assoc. Inst. C.E., Fellow of the Calcutta University, Principal Thomason Civil Engineering College, Roorkee, crown 8vo, cloth,

3 0

**Iron.**

Iron as a material of Construction, forming a Hand-book for the use of Students in Engineering, by William Pole, C.E., *cuts*, post 8vo, cloth

6 0

**CONTENTS :**

Production of Pig Iron and Malleable Iron, on the Mechanical Properties of Iron generally, Cast Iron, its Strength, Elasticity, etc., Different Qualities of Iron, etc.

**Iron Construction.**

Works in Iron, Bridge and Roof Structures, by Ewing Matheson, *numerous engravings*, royal 8vo, cloth

15 0

**CONTENTS :**

Bridges, Piers, Screw Piles, Cylinders and Caissons, Cofferdams, Abutments and Wing-walls, Bridge Platforms, Transport and Erection of Bridges, Landing Piers and Jetties, Roofs and Buildings, Ornamental Iron Work, Painting and Gilding Iron Work, Technical Terms in English, French, German, Italian, and Spanish.

**Iron Ships.**

The Fouling and Corrosion of Iron Ships ; their causes and means of prevention, with the mode of application to the existing Ironclads, by Charles F. T. Young, C.E., Assoc. I.N.A., *with illustrations*, 8vo, cloth

10 6

**Jonathan Hulls.**

A description and draught of a new invented Machine for carrying Vessels or Ships out of or into Harbour, Port, or River, against Wind and Tide, or in a Calm, by Jonathan Hulls, 1737, *reprint in facsimile*, 12mo, half-morocco

2 0

**Kanawha River.**

Report on the Improvement of the Kanawha and incidently of the Ohio River, by means of Artificial Lakes, by Charles Ellet, jun., C.E., *plates*, imperial 8vo, sewed

7 6

**Light.**

Lectures on Polarized Light, together with a Lecture on the Microscope, by the late Jonathan Pereira, M.D., F.R.S., etc., edited by the Rev. B. Powell, M.A., etc., *numerous woodcuts*, 12mo, cloth

2 6

**Liquid Fuel.**

On Liquid Fuel, by Benjamin H. Paul, Ph.D., 8vo, sewed

1 0

**Link-Motion.**

Link-Motion and Expansion-Gear practically considered, by N. P. Burgh, Engineer, *illustrated with 90 plates and 229 wood engravings*, small 4to, handsomely half-bound in morocco £2 2 0

**CONTENTS :**

The History of the Invention of the Link-Motion ; Principles of the action of Steam-working Valves ; History of the practical application of Valve-Gearing ; Geometrical principles of the action of Eccentrics and Link-Motions, according to their relative positions, as applied for Valve-Gears of Steam Engines ; Action of Steam-working Valves ; Action of the Steam ; Application of Valve-Gearing (original) ; Adjustable Eccentrics ; Action of the Link-Motion ; Action of the Slide Valve ; Action of the Eccentrics ; Angles of Eccentrics (to set) ; Cams, shape of ; Cut-off explained ; Expansion explained ; Exhaustion explained ; Eccentric Rods (length of) ; Geometry of the Link-Motion and Valve ; Lead explained ; Lap explained ; Link-Motion explained ; Rules.

Excepting in the work 'Modern Marine Engineering,' there is no book that contains practical description and illustration of the Link-Motion and Expansion-Gear. Mr. Burgh therefore put himself in communication with the principal Mechanical Engineering Firms of England and Scotland, for the purpose of making this the Standard Book of Reference on the above subjects.

The following Firms have contributed Drawings and Articles.

Messrs. PENN	Messrs. RAVENHILL	Messrs. DOUGLAS
" MAUDSLAY	" NAPIER	" JEFFERY
" WATT	" SPENCER	" WOOD
" RENNIE	" DUDGEON	" HURDLEY
" HUMPHREYS	" HARVEY	" SHELMEKDINE
	" HAWTHORN	

**Marine Engine.**

The Principles that govern the future development of the Marine Boiler Engine, and Screw-Propeller, read before the Society of Arts, by N. P. Burgh, Engineer, *with four plates*, imp. 8vo, sewed 2 0

**Mathematics.**

Formulae, Rules, and Examples for Candidates for the Military, Naval, and Civil Service Examinations, also for Mathematical Students and Engineers, by T. Baker, C.E., 12mo, cloth 1 0

**Mechanics.**

The Essential Elements of Practical Mechanics, based on the principle of work, designed for Engineering Students, by Oliver Byrne, formerly Professor of Mathematics, College for Civil Engineers, second edition, *illustrated by numerous wood engravings*, post 8vo, cloth 7 6

**CONTENTS :**

Chap. 1. How work is measured by a unit, both with and without reference to a unit of time. Chap. 2. The work of living agents, the influence of friction, and introduces one of the most beautiful laws of motion. Chap. 3. The principles expounded in the first and second chapters are applied to the motion of bodies. Chap. 4. The transmission of work by simple machines. Chap 5. Useful propositions and rules.

**Mechanical Engineering.**

The Mechanician and Constructor for Engineers, comprising Forging, Planing, Lining, Slotting, Shaping, Turning, Screw Cutting, etc., by Cameron Knight, illustrated by 96 4to plates, containing 1147 illustrations, and 397 pages of letterpress, 4to, half morocco £2 12 6

The Mechanician is essentially a book of processes, including all operations by which the principal portions of engines are forged, planed, lined, turned, and otherwise treated. The author endeavours to perform two things—to explain to uninitiated students how engines are really made, together with the fundamental principles involved in making them, and also to produce a book which shall be useful to practical mechanics for reference in the difficult details of their business.

Of the six chapters constituting the work, the first is devoted to forging; in which the fundamental principles to be observed in making forged articles of every class are stated, giving the proper relative positions for the constituent fibres of each article, the mode of selecting proper quantities of material, steam hammer operations, shaping-moulds, and the manipulations resorted to for shaping the component masses to the intended forms.

Engineers' tools and their construction are next treated, because they must be used during all operations described in the remaining chapters, the author thinking that the student should first acquire knowledge of the apparatus which he is supposed to be using in the course of the processes given in Chapters 4, 5, and 6. In the fourth chapter, planing and lining are treated, because these are the elements of machine-making in general. The processes described in this chapter are those on which all accuracy of fitting and finishing depend. The next chapter, which treats of shaping and slotting, the author endeavours to render comprehensive by giving the hand-shaping processes in addition to the machine-shaping.

In many cases hand-shaping is indispensable, such as sudden breakage, operations abroad, and on board ship, also for constructors having a limited number of machines. Turning and screw-cutting occupy the last chapter. In this, the operations for lining, centering, turning, and screw-forming are detailed and their principles elucidated.

The Mechanician is the result of the author's experience in engine making during twenty years; and he has concluded that however retentive the memory of a machinist might be, it would be convenient for him to have a book of primary principles and processes to which he could refer with confidence.

**Mechanical Movements.**

The Mechanical Inventor's Guide, comprising familiar treatises on the Laws of Motion, the Mechanical Powers, and Drums and Belts, and Toothed Wheels, and a collection of nearly 300 Mechanical Movements, forming a practical introduction to the principles and components of Machinery, illustrated by 10 plates, containing 280 Diagrams, by Jas. Wyllson, C.E., 12mo, cloth

2 6

**Metric Weights and Measures.**

Scales for the Ready Comparison of British and Metric Weights and Measures, by A. L. Newdigate, M.A., in neat cloth case

5 0

**Military Terms.**

A Handy Dictionary of Military Terms, by Major W. W. Knollys, F.R.G.S., 93rd Sutherland Highlanders, Garrison Instructor, Home District, etc., 18mo, cloth

2 0

**Mill Work.**

Buchanan's (R.) Practical Essays on Mill Work and other Machinery, with examples of tools of mode of invention, and Supplement, edited by T. Tredgall G. Rennie, 88 *plates*, 3 vols., royal 8vo

**Mill Gearing.**

A Practical Treatise on Mill Gearing, Wheels, S Riggers, etc., for the use of Engineers, by Thomas post 8vo, cloth, *with 8 plates*

**Millwright's Companion.**

The Millwright and Engineer's Companion,prising decimal arithmetic, tables of square and roots, practical geometry, mensuration, strength materials, mechanic powers, water-wheels, pump pumping engines, steam engines, tables of gravity, etc., by William Templeton, fifteenth e corrected by Samuel Maynard, *plates*, 12mo, cloth

**Mine Engineering.**

A New Edition of a Practical Treatise on Mining, by G. C. Greenwell, F.G.S., Colliery V Member of the North of England Institute of Engineers, etc., etc., etc., *containing 64 coloured drawings to a large scale, and 255 pp. of letterpress* handsomely half-bound in morocco

**CONTENTS :**

Geology, as applied to Mining. Classes of Rocks common Mining for Salt, Coal, and Metallic Ores. Building Materials and Mineral Veins. Internal Heat. Metallic Ores, and Methods therewith, and with Coal. Smelting. Boring and Sinking Tunnelling. Tubbing. Management of Quicksands and Clay gins and Pumps. Winding Engines. Ropes. Pulleys. Scaffolds, and other Materials. The Working of Mines. Copper. Iron. Salt. Coal. Ventilation. Theory and Practice. Fire. Explosive Acid and other Gases. Explosions, and other Casualties.

**Millwright's Guide.**

The Practical Millwright's and Engineer's Reckoner, or Tables for finding the diameter and of cog-wheels, diameter, weight, and power of : diameter and strength of bolts, etc., by Thomas third edition, 12mo, cloth

**CONTENTS :**

Diameter and power of wheels, diameter, weight and power of pliers for steam used expansively, diameters and strength of weight of hexagonal nuts, speed of governors for steam engines pumps, working barrels, circumferences and areas of circles, plates, French and English weights and measures, etc.

**Mining.**

A Treatise on the Ventilation of Coal Mines; together with a Narrative of Scenes and Incidents from the Life of a Practical Miner, by Robert Scott, late Chief of the Ventilating Department at Coxlodge Colliery, second edition, *with illustrations*, 8vo, sewed

1 0

**Mining.**

Records of Mining and Metallurgy; or Facts and Memoranda for the use of the Mine Agent and Smelter, by J. Arthur Phillips and John Darlington, in crown 8vo, cloth, *illustrated with wood engravings*

4 0

**Narrow Gauge Railways.**

Narrow Gauge Railways, by C. E. Spooner, C.E., F.G.S., *illustrated with 25 folding plates*, 8vo, cloth

12 6

**CONTENTS :—**

Copy of paper read at the "Inventors' Institute" on Narrow Gauge Railways—the Festiniog Railway—Experiment on the Festiniog Railway—Captain Tyler's Report—The Railways of the Future—Advantages gained by Narrow Gauge Railways—Railway Gauges—Narrow Gauge Rolling Stock—Battle of the Gauges—Indian Railway Gauges and Rolling Stock, etc.

**Naval Architecture.**

Our Ironclads and Merchant Ships, by Rear-Admiral E. Gardiner Fishbourne, C.B., *plates*, 8vo, cloth

10 6

**CONTENTS :**

Danger of the present system of Ship-building; Errors of Calculation; Value of Life-Belts to Ships; True Measure of Stability; Effects of Unequal Distribution of Weight laterally; Defects of Ironclads; Experiments on the 'Sultan' and 'Devastation'; Stowage of Ships; Errors in the current mode of estimating the Stability of Ships; and an outline of a correct and rapid mode of Calculation, proved by mathematical reasoning, etc.

**Naval Architecture.**

Current Fallacies in Naval Architecture, by E. Gardiner Fishbourne, C.B., Retired Rear-Admiral, *plates*, 8vo, sewed

1 0

Do. do. Second Series, 8vo, sewed

1 0

**Naval Architecture.**

The Loss of H.M.S. 'Captain,' illustrating a new Principle of Naval Architecture, for the first time enunciated, by E. Gardiner Fishbourne, C.B., Retired Rear-Admiral, *plates*, 8vo, sewed

1 6

**Navigation.**

Rules in Navigation and Nautical Astronomy, for the use of Mariners desirous of obtaining certificates of competency at the Local Marine Board Examinations, by D. Thomson, M.A., Author of Thomson's 'Engineers' Guide,' second edition, 12mo, sewed

1 6

**Oblique Arches.**

A Treatise on the Art of constructing Oblique Arches, with Spiral Courses, by Wm. Donaldson, M.A., Associate Institute Civil Engineers, *plates*, 8vo, cloth

4 0

**Outpost Duty.**

Practical Lessons in Reconnoitring, Outpost Duty, etc., suggested by the late Autumn Manœuvres, Nos. 1 and 2 each 1 6

**Patent Law.**

Patent Law Considered as affecting the Interests of the Million, being Three Pamphlets. 1. On the so-called "Patent Monopoly." 2. Statistics of Patents. 3. The Policy of a Patent Law, by Henry Dircks, C.E., LL.D., etc., 8vo, cloth 4 0

**Perpetual Motion.**

Perpetuum Mobile, or, Search for Self-Motive Power during the 17th, 18th, and 19th Centuries, illustrated from various authentic sources in papers, essays, letters, paragraphs, and numerous patent specifications, with an Introductory Essay by Henry Dircks, C.E., with numerous engravings of machines, crown 8vo, cloth 10 6

" " Second Series, with numerous engravings and portraits, crown 8vo, cloth 10 6

"A curious and interesting work. Mr. Dircks' chief purpose was to collect together all the materials requisite to form a record of what has been done, or attempted rather, in this curious branch of *quasi* science, and most instructive in one sense it is. Mr. Dircks' volume is well worth looking into; it contains a vast deal of entertaining matter."—*Builder*.

"Dr. Dircks is not a visionary searching for the *Perpetuum Mobile*. He perceives its folly. While the search for it, he says, is not of itself 'evidence of insanity, it is unquestionably a proof of ignorance, or of mental inability to master elementary knowledge;' and this book is a history of the blunders that have been suggested as solutions of the insoluble problem. The book is copiously illustrated; and certainly to the intelligent mechanic, perhaps even to the general reader, it will be a book acceptable in leisure hours."—*Echo*, Oct. 3, 1870.

**Petroleum.**

A Practical Treatise on Coal, Petroleum, and other Distilled Oils, by A. Gesner, M.D., second edition, revised and enlarged, by G. W. Gesner, 8vo, cloth 9 0

**Petroleum.**

A Treatise on the Petroleum Zones of Italy, by E. St. John Fairman, F.G.S., with maps, 8vo, sewed, 2 6

**Platelayers' Tables.**

Tables for Platelayers, compiled from the Formula in the Work on Switches and Crossings, by Wm. Donaldson, M.A., A.I.C.E., author of Switches and Crossings, and a Treatise on Oblique Arches, plates, 12mo, cloth 3 6

**Public Works of America.**

Travaux Publics des Etats-unis d'Amérique en 1870, Rapport de Mission par M. Malézieux, Ingénieur en chef, Professeur à l'Ecole Nationale des Ponts et Chaussées, publié par ordre de M. le Ministre des Travaux Publics, fine plates, 2 vols., royal 4to, sewed £3 10 0

**Port of Calcutta.**

The Port of Calcutta, with special reference to the late Cyclone, and remedial Measures to be adopted, by Charles C. Adley, Esq., C.E., *plates*, 8vo, sewed 2 0

**Pump Fitter's Guide.**

The Pump Fitter's Guide, for calculating and fixing Pumps, containing practical formula in Hydraulics, and various Tables for pipes and branches, by John Eldridge, *plates*, 12mo, sewed 1 0

**Railway Crossings.**

Switches and Crossings; Formulae for ascertaining the Angles of Crossings, the Lengths of Switches, and the Distances of the Points of the Crossings and the Heels of the Switches from the Springing of the Curve, by W. Donaldson, M.A., A.I.C.E., Author of 'A Treatise on Oblique Arches,' *plates*, 8vo, cloth 10 6

**Railway Curve Tables.**

Tables for setting out Railway Curves, arranged by Chas. Pullar Hogg, C.E., a series of cards arranged for Manipulation, with a sheet of Explanations and Examples, in neat cloth case 4 6

These Tables are intended to facilitate the ranging of circular Arcs, by the method of Tangential Angles, introduced by Professor Rankine; they are suitable for any unit of length, British or Foreign, so long as the angles and the arcs are expressed in the same unit. The angles are given in degrees, minutes, and decimals.

**Railway Curves.**

Tables for setting out Curves for Railways, Canals, Roads, etc., varying from a radius of five chains to three miles, either with or without a Theodolite, by Archibald Kennedy and R. W. Hackwood, 32mo, cloth 2 6

**Railway Curves.**

Treatise on the setting out of Railway Curves, with full Tables of the Angles, Distances, and Offsets required, especially arranged for the use of Measurements in feet and imperial links, but also adapted for the use of any other unit of Measurement, by David Livingstone, crown 8vo, cloth 10 6

**Railway Curves.**

A new Table for setting out Curves of any radius by any system of Measurement, compiled by Geo. J. Armytage, 12mo, sewed 1 6

**Railway Curves.**

Tables for setting out Curves on Railways and other Public Works, by J. S. Olver, C.E., mounted on a sheet and folded in a cloth case, crown 8vo 5 0

**Railway Stations.**

Examples of Station Buildings, and their cost, as executed on several Railways, being an Appendix to Estimates and Diagrams of Railway Bridges, etc., by J. W. Grover, M.I.C.E., 13 *plates*, folio, cloth

10 6

**Reservoirs**

On the Construction of Catch-water Reservoirs in Mountain Districts for the supply of Towns, or for other purposes, by C. H. Beloe, Author of 'The Handbook of the Liverpool Water-works,' *plates*, 8vo, cloth

5 0

**Reservoirs.**

On the Designing and Constructing of Storage Reservoirs, by Arthur Jacob, B.A., *folding plates*, 8vo, stiff wrapper

2 0

**Retaining Walls.**

Surcharged and different Forms of Retaining Walls, by J. S. Tate, *cuts*, 8vo, sewed

2 0

**Roads.**

Report on the Economical Road Maintenance and Horse-draught through Steam Road-rolling, with special reference to the Metropolis, by F. A. Paget, C.E., 8vo, sewed

2 0

**Ropemaking.**

A Treatise on Ropemaking as practised in public and private Rope-yards, with a description of the manufacture, rules, tables of weights, etc., adapted to the Trade, Shipping, Mining, Railways, Builders, etc., by R. Chapman, formerly foreman to Messrs. Huddart and Co., Linehouse, and late Master Ropemaker to H.M. Dockyard, Deptford, second edition, 12mo, cloth

3 0

**Scientific Studies.**

Scientific Studies; or Practical in contrast with Chimerical Pursuits, exemplified in Two popular Lectures, first, the Life of Edward Somerset, second Marquis of Worcester, Inventor of the Steam Engine; second, Chimeras of Science, Astrology, Alchemy, Squaring the Circle, Perpetuum Mobile, etc., by Henry Dircks, C.E., with *illustrative diagrams*, crown 8vo, cloth

3 0

**Sanitary Engineering.**

The Drainage of the Valley of the River Lea, and the Utilization of the Sewage of the Towns within its Watershed, by Bailey Denton and Rogers Field, Esqrs., with *map*, 8vo, sewed

2 0

**Sanitary Engineering.**

Sanitary Engineering, a Guide to the Construction of Works of Sewerage and House Drainage, with Tables for facilitating the Calculations of the Engineer, by Baldwin Latham, C.E., Mem. Inst. C.E., Past President of the Society of Engineers, etc., 21 *plates* and 112 *woodcuts*, 8vo, cloth

30 0

**Screw Propulsion.**

A practical Treatise on modern Screw-Propulsion,  
by N. P. Burgh, Engineer, *illustrated with 52 large*  
*plates and 103 woodcuts*, 4to, half-morocco £2 2 0

**CONTENTS :**

CHAPS. 1 and 2. Introduction, by G. B. Rennie, M.I.C.E.—CHAP. 3. The Geometry of Screw Propellers.—CHAP. 4. The History of the Griffith Screw Propeller, by R. Griffith.—CHAP. 5. The Geometry of the Griffith Screw Propeller.—CHAP. 6. The Geometry of the Paddle-Wheel, by Charles Barclay.—CHAP. 7. A description of Modern Screw Propellers, constructed by the most eminent Marine Engineers in England and Scotland.—CHAP. 8. On Twin Screw Propellers, by Messrs. W. and J. Dudgeon.—CHAP. 9. On Twin Screw Propellers.—CHAP. 10. General Remarks on the Twin Screw System, by Capt. T. E. Symonds, R.N.—CHAPS. 11 and 12. A description of modern details in connection with Propellers.—CHAP. 13. The Practical Results of lignum vite bearings for Screw Propellers and Screw Shafting, by John Penn, M.E. and C.E.—CHAP. 14. A description of the Feathering Screw Propeller, as fitted to certain ships by Messrs. Maudslay, Son, and Field.—CHAP. 15. A description of several proposed arrangements for feathering the Blades of Screw Propellers.—CHAP. 16. A description of modern examples of thrust blocks as fitted to Screw Propellers shafting.—CHAPS. 17 and 18. The Principles of thrust blocks for resisting the thrust of Screw Propellers, by Mr. W. Langdon.—CHAP. 19. A description of a new principle of the Screw Propeller, by Arthur Rigg.—CHAPS. 20 and 21. A comparative review of modern Screw Propellers.—CHAP. 22. Rules for the proportion of Screw Propellers. An Appendix to Chap. 15; Feathering Screw Propeller, by Robert Griffith, etc., etc.

**Screw Cutting.**

Screw Cutting Tables, for the use of Mechanical Engineers, showing the proper arrangement of Wheels for cutting the Threads of Screws of any required pitch, with a Table for making the Universal Gas Pipe Threads and Taps, by W. A. Martin, Engineer, second edition, royal 8vo, oblong, cloth 1 0  
Ditto „ sewed 0 6

**Sewage.**

A Handbook of Sewage Utilization, by Ulick Ralph Burke, Esq., Barrister-at-Law, crown 8vo, cloth 3 6

This work treats, I. Of the evils of the present system of Sewage Treatment, the Pollution of Water, and the Waste of Manure. II. Remedies, Privy, and Ash-pit; Eureka System; Milan, Goul, and Moule's Systems. III. Treatment of Sewage by Chemical means, Experiments with Lime; Lime and Chloride of Iron; Sulphate of Ammonia; Holden's Process; Sulphate of Alumina; Persalts of Iron; Blyth, Lenk, Phosphate, A.B.C., Scott, and Hille Processes; Filtration. IV. Irrigation. With an APPENDIX, including the Law relating to Sewage Utilization.

**Sewage.**

Sewage Farming; No. 1, with some remarks on the position of Sewer Authorities in relation to Lands to which Sewage is applied, by J. Bailey Denton, Mem. Inst. C.E., 8vo, sewed 1 0

**Sewage.**

The Drainage and Sewerage of Towns, by John Phillips, C.E., 8vo, sewed 1 6

**Sewage.**

The Sewage Question ; on the Treatment and Utilization of Sewage, the Preparation of Land for Irrigation, and for Intermittent Downward Filtration, by J. Bailey Denton, Mem. Inst. C.E., F.G.S., 8vo, sewed

2 0

**Sewage.**

A new Scheme for the treatment of the Sewage Matter of our Towns, by utilizing it upon the Waste Land in the Country, thereby holding out an inexhaustible means for the Employment of the Labouring Classes, by Edward Brown, Slough, Bucks, 8vo, sewed

0 6

**Sewage.**

Sanitary Works and Sewage Utilization, by J. Bailey Denton, F.G.S., Mem. Inst. C.E., 8vo, sewed

1 0

**Sewage.**

A Lecture on the Sewage Difficulty, by Baldwin Latham, C.E., delivered at Maidenhead before the Local Board of Health, 8vo, sewed

1 0

**Sewage.**

A Scheme of Sewage and Sewage Utilization for Hornsey, prepared for the Local Board of Health, by Baldwin Latham, *map*, 8vo, sewed

2 6

**Sewage.**

Sanitary Siftings ; or Results of Sewage Systems compared, by a Naval Officer, 8vo, sewed

0 6

**Sewage.**

Sanitary Science and the Sewage Question, a Lecture addressed to the Department of Applied Sciences, in King's College, London, by Lewis Angell, Mem. Inst. C.E., 8vo, sewed

1 6

**Sewage.**

Sanitary Legislation and Science, with especial regard to Sewage and Water Supply (forming a resumé of the Sewage Question), being the Substance of Two Lectures delivered before the Literary and Philosophical Society of Nottingham, by M. O. Tarbolton, Memb. Inst. C.E., Engineer to the Corporation of Nottingham, 8vo, sewed

1 6

**Sewing Machine.**

The Sewing Machine ; its History, Construction, and Application, translated from the German of Dr. Herzberg, by Upfield Green, *illustrated by 7 large lithographic plates*, royal 8vo, ornamental boards

7 6

**Silver Mines.**

Vazeeri Rupi, the Silver Country of the Vazeers, in Kulu : its Beauties, Antiquities, and Silver Mines, including a Trip over the lower Himalayah Range and Glaciers, by J. Calvert, F.G.S., Mem. Inst. C.E., *illustrated with a map and coloured plates*, 8vo, cloth

16 0

**Sheet Metal Worker.**

Sheet Metal Worker's Instructor, for Zinc, Sheet Iron, Copper, and Tin Plate Workers, etc., containing a Selection of Geometrical Problems, and practical and simple rules for describing the various patterns required in the different branches of Metal Working, 32 *plates*, 8vo, cloth

10 6

**Slide-Valve.**

The Slide-Valve practically considered, by N. P. Burgh, Engineer, fourth edition, containing 88 *illustrations*, and 121 *pages of letterpress*, crown 8vo, cloth

5 0

The following is a portion of a Review by R. Mallet, Esq., M.I.C.E., etc. :—

“Mr. Burgh's methods are viewed here in the practical light of the workshop, and with good examples of how the principles inculcated have been carried out by some of our best engineering firms. The most essential questions in relation to valve gear—and no working man who is ignorant of them is fit to be entrusted with the management, much less repair, of either a land or a marine engine of any magnitude—such as the effect upon the successive positions of the valve of the length of the connecting rod, and also that of the eccentric rod or its equivalent—are extremely clearly put and well illustrated, and simple diagrams and rules are given for finding the errors of traverse and their correction. The three last chapters are wholly of a practical character, and treat of the proportions of slide-valves as employed by our great engineering firms—Penn, Maudslay, Ravenhill, Watt, etc.—with eleven illustrated and illustrative examples, and of modes of packing, balancing, etc.

**Specifications.**

Practical Specifications of Works executed in Architecture, Civil and Mechanical Engineering, and in Road Making and Sewering; to which are added a Series of Practically useful Agreements and Reports, by John Blenkarn, with 15 *folding plates*, 8vo, cloth

18 0

**LIST OF PLATES.**

- |  |  |

| 1.—Elevations and Plans of Cottages at Barnet.   | 9.—Details of Ironwork.  |
| 2.—Elevations and Plans of Houses at Maidstone.  | 10.—Details of Ironwork, Piling, &c.                               |
| 3.—Elevation and Section of Villa at East Cowes. | 11.—Section of Artesian Well.                                      |
| 4.—Ground and First Floor of Do.                 | 12.—Elevation and Section of Wrought-Iron Bridge.                  |
| 5.—Elevation of Villa at East Cowes.             | 13.—Plan, Elevation, and Section of Wrought-Iron and Brick Bridge. |
| 6.—Ground and First Plan of Do.                  | 14.—Section and Plan of Engine and Engine House.                   |
| 7.—Details of Sewer Work.                        | 15.—Elevation of Timber Bridge.                                    |
| 8.—Details of Ironwork, Piling.                  |  |

**Steam.**

Economy in the use of Steam, a statement of the principles on which a saving of Steam may be best effected, by Frank Salter, B.Sc., *cuts*, crown 8vo, cloth

3 6

**Steam.**

On the Velocity of Steam and other Gases, and the true principles of the discharge of Fluids, by R. D. Napier, 8vo, sewed

1 6

## Steam Boilers.

Practical Treatise on Steam Boilers and Boiler Making, by N. P. Burgh, Mem. Inst. Mec. Eng., *illustrated by 1163 wood engravings and 50 large folding plates of working drawings*, royal 4to, half-morocco £3 13 6

### CONTENTS:

Marine Boilers. Locomotive Boilers. Portable Land Boilers. Stationary Land Boilers. Cylindrical Boilers. Vertical Boilers. Tube Boilers. Circular Boilers. Water Tube Boilers. Fire Engine Boilers. Furnace Boilers. Gas Fuel Boilers. Oil Fuel Boilers. Mechanical Coal-Feeding Furnaces. Mechanical Oil-Feeding Furnaces. Self-Acting Non-Feed Alarm Apparatus. Safety Valves, with Loads and Self-Adjusting Springs. Feed Pumps. Feed Injectors. Self-Acting Feed-Water Apparatus. Smoke Consuming Apparatus. Construction. Proportions. Setting. Rules. Contracts. Repairs. Prices. Explosions. Nature of Metals used. Galvanic Actions. Incrustation and Cleansing.

## Steam Engine.

Practical Illustrations of Land and Marine Engines, showing in detail the modern improvements of High and Low Pressure, Surface Condensation and Superheating, together with Land and Marine Boilers, by N. P. Burgh, Engineer, 20 *plates in double elephant folio*, cloth £2 2 0

### LIST OF PLATES.

*Plate 1.* High Pressure Steam Engine. 12 H.P.; Scale  $1\frac{1}{2}$  in. = 1 foot; 3 Views.

*Plate 2.* Details of High Pressure Engine, 12 H.P.; Scale 3 in. = 1 foot.

Cylinder, Piston, Slide Casing, Slide Valve and Rod, Connecting Rod, Piston Rod and Guide Block, Eccentric and Band, Slide Connecting Rod, Disengaging Socket Eccentric Rod, Weigh Shaft, Lever Stud Bracket, Slide and Pump Levers, Main Lever, Starting Handle, Ball Governor in detail, Governor Standard and Pulley.

*Plate 3.* Details of High Pressure Engine, 12 H.P.; Scale 3 in. = 1 foot.

Main Framing, Fly-Wheel, Crank, and Shaft, Feed Pump, Disengaging Socket, Link and Pin, Governor, Mitre Gear, Holding Bolts, Studs, Plates.

*Plate 4.* Details of High Pressure Engine, 12 H.P.; Half size.

Feed Pump, Valves and Box, Relief Valve, Safety Valve, Starting and Governor Valves, Engine Feed Cock, Boiler Front Doors, Fire Bars, and Supports.

*Plate 5.* Boiler and Settings, 12 H.P.; Scale  $\frac{1}{2}$  in. = 1 foot; 4 Views.

*Plate 6.* Patent Antifricition Trunk Engine, 6 H.P. Arrangement, 4

Views; Scale  $1\frac{1}{2}$  in. = 1 foot; Details—Scale 3 in. = 1 foot.

Cylinder, Slide Valve and Casing, Piston Covers and Trunks, Piston Rod and Guide Rod, Connecting Rod Main Framing, Fly-Wheel, Governor and Levers, Eccentric Rods and Strap, Shaft and Discs, Starting Handle, Feed Pump, and Plunger.

### MARINE ENGINES.

*Plate 7.* Marine Engine, Direct Action for the Screw Propeller, 400 H.P. Collectively; Scale  $\frac{1}{2}$  in. = 1 foot; 7 Views.

*Plate 8.* Details of One Marine Engine, 200 H.P.; Condenser and Air Pump, Feed and Bilge Pumps, Cylinder, Equilibrium Slide Valve and Casing, Main Frame, Connecting Rod; Scale 2 in. = 1 foot; Guide Block and Cross Head—Scale 2 in. = 1 foot; Discharge and Suction Valves for Air Pump, 3 in. = 1 foot.

*Plate 9.* Details of One Marine Engine, 200 H.P.

Eccentrics and Straps, Solid Valve Link and Block, Slide Valve Rod and Guide, Blow-through Valve, Shifting Valve, Relief Valve, Bilge and Feed Pump Valves, Spur Wheel for Expansion Gear, Kingston and Injection Valves—Scale 3 in. = 1 foot, Crank Shaft—Scale  $1\frac{1}{2}$  in. = 1 foot.

LAND AND MARINE ENGINES (*continued*).

- Plate 10.** Details of One Marine Engine, 200 H.P.; Scale 3 in. = 1 foot.  
Air Valves for Air Pumps, Steam Piston Injection Pipe, Air Pump Plunger, Air, Feed, and Bilge Pump Rods, Blow-through Valve for Condenser, Bracket for Reversing Gear, Drain Cock and Handle for Condenser.
- Plate 11.** Scale 3 in. = 1 foot; Expansion Valve Gear, Throttle Valve, and end of Thrust Shaft for Marine Engine 200 H.P.
- Plate 12.** Oscillating Engines for the Paddle Wheel, 150 H.P., Collectively—Scale 1 in. = 1 foot; 7 Views.
- Plate 13.** Paddle Feathering Wheel, 75 H.P.—Scale 1 in. = 1 foot; 2 Views.
- Plate 14.** Details of Paddle Wheel, 75 H.P.  
Paddle Centre, Plummer Block, Eccentric Shaft, and Bracket Lever Arms, Rings, Stays, Rods, Bolts and Floats, Float Clamps, Arm Stays and Floats.—Scale 3 in. = 1 foot.
- Plate 15.** Griffith Patent Screw Propeller, with Lifting Frame.—Scale 1½ in. = 1 foot.
- Plate 16.** Arrangement of a Pair of Marine Steam Engines of 900 H.P. for the Imperial Ottoman Ironclad Frigate, 'Sultan Mahmoud,' constructed by Ravenhill, Salkeld, and Co.—Scale ½ in. = 1 foot.
- Plate 17.** Marine Boiler, with Superheating Tubes—Scale 1 in. = 1 foot; 6 Views.
- Plate 18.** Ordinary Condenser, and Air Pump, for Screw Marine Engine, 200 H.P., and Oscillating Paddle Engine, 75 H.P.; 8 Views.
- Plate 19.** Surface Condenser, 200 H.P.—Scale 1½ in. = 1 foot; 4 Views.
- Plate 20.** General Arrangement of Engines, Boilers, Shafting, and Screw for a Dispatch Boat, 100 H.P.—Scale ½ in. = 1 foot; 5 Views.

*The detailed plates have the dimensions fully given.*

**Steam Boilers.**

The Boiler-makers' and Iron Ship-builders' Companion, comprising a series of original and carefully calculated tables, of the utmost utility to persons interested in the iron trades, by James Foden, author of 'Mechanical Tables,' etc., fcap. 8vo, cloth

5 0

**Steam Boilers.**

The Modern Practice of Boiler Engineering, containing observations on the construction of steam boilers, and remarks upon furnaces used for smoke prevention, with a chapter on explosions, by Robert Armstrong, C.E., revised, with the addition of Notes and an Introduction, by John Bourne, Esq., with engravings, fcap. 8vo, cloth

2 0

"The collected experience of a practical Engineer, who for thirty years of his life has directed his attention to the construction of Steam Boilers and Furnaces. It is a valuable addition to the stock of Engineering knowledge, and it will be generally more appreciated because it is condensed within so small a volume as the one before us."—*Civil Engineers' and Architects' Journal*.

**Steam Boilers.**

Records of Steam Boiler Explosions, by Edward Bindon Marten, with numerous diagrams, 8vo, cloth

5 0

**Steam Engine.**

The Engine Room; who should be in it, and what they should do; also the application of the Indicator to Marine Engines, by an Old Hand, plates, 8vo, cloth

3 6

**Steam Engine.**

Modern Marine Engineering applied to Paddle and Screw Propulsion; consisting of 36 *plates*, 259 *wood engravings*, and 403 pages of descriptive matter, the whole being an exposition of the present practice of the following firms:—Messrs. J. Penn and Sons; Maudslay, Sons, and Field; James Watt and Co.; J. and G. Rennie; R. Napier and Sons; J. and W. Dudgeon; Ravenhill and Hodgson: Humphreys and Tennant; Mr J. F. Spencer; and Messrs. Forester and Co. By N. P. Burgh, Engineer, 4to, cloth £2 5 0

**Steam Engine.**

Modern Compound Engines, being a Supplement to Modern Marine Engineering, by N. P. Burgh, Mem. Inst. Mech. Eng., numerous *large plates of working drawings*, 4to, cloth 18 0

The following Firms are contributing Working Drawings of their best and most modern examples of Engines fitted in the Royal and Mercantile Navies:—Messrs. Maudslay, Rennie, Watt, Dudgeon, Humphreys, Ravenhill, Jackson, Perkins, Napier, Elder, Laird, Day, Allibon.

**Steam Engine.**

Practical Treatise on the Condensation of Steam; contained in 262 pages of letterpress, and *illustrated with 212 engravings*, by N. P. Burgh, Engineer, super-royal 8vo, cloth 25 0

**CONTENTS:**

Method of Condensing Steam, in Steam Engines, between the years 1705 and 1838. Modern Injection Condensers for Land Beam Engines. Modern Injection Condensers for Oscillating Paddle-Wheel Marine Engines. Injection Condensers for Horizontal Marine Screw-Propeller Engines. Tubular Arrangements for Surface Condensation. Tube Packings for Surface Condensation. Surface Condensers for Paddle-Wheel Engines. Surface Condensers for Inverted Vertical Direct-Acting Screw Engines. Surface Condensers for Horizontal Direct-Acting Screw-Propeller Engines. Surface Condensers for Horizontal Return-Action Screw Engines. Arrangement of Pumps and Valves for Marine Engines. Valve-Connections for Pumps of Marine Engines. Supplementary Details for Condensers of Marine Engines. Arrangement of Pump Valves for Land Engines. Apparatus for the Condensation of Steam without Air Pumps. Condensing Apparatus for Locomotive Engines. The Principles of the Condensation of Steam. Rules and Tables for Practical use, etc.

**Steam Engine.**

A Pocket-Book of Practical Rules for the Proportions of Modern Engines and Boilers for Land and Marine purposes, by N. P. Burgh, 4th edition, revised, with Appendix, royal 32mo, roan 4 6

Details of High Pressure Engine, Beam Engine, Condensing, Marine Screw Engines, Oscillating Engines, Valves, etc., Land and Marine Boilers, Proportions of Engines produced by the rules, Proportions of Boilers, etc.

**Steam Engine.**

The Practical Examiner, on Steam and the Steam Engine, with instructive references relative thereto, arranged for the use of Engineers, Students, and others, by W. Templeton, 12mo, cloth 2 0

**Steam Engine.**

Notes on the Theory of the Steam Engine, being part of a course of instruction in the subject, given in the Royal School of Naval Architecture and Marine Engineering, by James H. Cotterill, M.A., Vice-Principal of the Royal School of Naval Architecture and Marine Engineering, 8vo, sewed

3 0

**Strength of Beams.**

On the Strength of Beams, Columns, and Arches, considered with a view to deriving methods of ascertaining the practical strength of any given section of Beam, Column, or Arch, in Cast Iron, Wrought Iron, or Steel, by B. Baker, *numerous cuts*, crown 8vo, cloth

9 0

**Strength of Beams.**

New Formulas for the Loads and Deflections of Solid Beams and Girders, by William Donaldson, M.A., Assoc. Inst. C.E., 8vo, cloth

4 6

**Strength of Iron.**

Results of an Experimental Inquiry into the Comparative Tensile Strength and other Properties of various kinds of Wrought Iron and Steel, by David Kirkaldy, second edition, *illustrated by numerous plates and diagrams*, 8vo, cloth

18 0

**Strength of Timber.**

Tables of the Strength and Deflection of Timber, by William Lea, Surveyor, post 8vo, cloth

1 6

**Sugar.**

The Practical Sugar Planter; a complete account of the cultivation and manufacture of the sugar-cane, according to the latest and most improved processes, describing and comparing the different systems pursued in the East and West Indies, and the Straits of Malacca, and the relative expenses and advantages attendant upon each, being the result of sixteen years' experience of a sugar-planter in those countries, by Leonard Wray, Esq., *with numerous illustrations*, 8vo, cloth

10 6

**Sugar.**

A Treatise on the manufacture of Sugar from the Sugar Cane, by Peter Soames, Assoc. King's Coll., London, Assoc. Inst. C.E., Editor of the 'Artizan,' *woodcuts and plates*, 8vo, cloth

12 6

**Sugar Cane.**

The Nature and Properties of the Sugar Cane, with practical directions for the improvement of its culture and the manufacture of its products, with a chapter on the manufacture of Sugar from Beetroot, by G. R. Porter, F.R.S., *plates*, 8vo, cloth

6 0

**Sulphuric Acid.**

The Chemistry of Sulphuric Acid Manufacture, by  
Henry Arthur Smith, *cuts*, crown 8vo, cloth 4 6

## CONTENTS:

Ground Plan of Kilns for Burning Sulphur Ores—Section of Pyrites Furnace—On the Presence of Arsenic—Methods for Removal of Arsenic—An Experimental Examination of the Circumstances which determine the Action of the Gases in the Lead-chamber—On the Distribution of Gases in the Lead-chamber—On the Temperature at which Nitric Acid acts upon Sulphurous Acid—On the Distribution of Heat in the Lead-chamber—An Inquiry into the Best Form of Leaden Chamber, etc.

**Surveying.**

A Practical Treatise on the Science of Land and Engineering Surveying, Levelling, Estimating Quantities, etc., with a general description of the several Instruments required for Surveying, Levelling, Plotting, etc., by H. S. Merrett, *41 fine plates, with illustrations and tables*, royal 8vo, cloth 12 6

**Surveying.**

The Principles and Practice of Engineering, Trigonometrical, Subterraneous, and Marine Surveying, by Charles Bourne, C.E., third edition, *numerous plates and woodcuts*, 8vo, cloth 5 0

**Table of Logarithms.**

Table of Logarithms of the Natural Numbers, from 1 to 108,000, by Charles Babbage, Esq., M.A., Stereotyped edition, royal 8vo, cloth 7 6

To ensure the correctness of these Tables of Logarithms, they were compared with Callet's, Vega's, Hutton's, Briggs', Gardiner's, and Taylor's Tables of Logarithms, and carefully read by nine different readers; and further, to remove any possibility of an error remaining, the stereotyped sheets were hung up in the Hall at Cambridge University, and a reward offered to anyone who could find an inaccuracy. So correct are these Tables, that since their first issue in 1827 no error has been discovered.

**Tables of Squares and Cubes.**

Barlow's Tables of Squares, Cubes, Square Roots, Cube Roots, Reciprocals of all Integer Numbers up to 10,000, post 8vo, cloth 6 0

**Telegraph Cables.**

Experimental Investigations of the Laws which govern the Propagation of the Electric Current in long Submarine Telegraph Cables, conducted for the Joint Committee appointed by the Lords of the Committee of Private Council for Trade, and the Atlantic Telegraph Company, by Latimer Clark, *plate*, small folio, boards 2 6

**Telegraph Cables.**

Guide for the Electric Testing of Telegraph Cables, by Captain V. Hoskiaz, *plates*, post 8vo, cloth 4 6

**Teeth of Wheels.**

Camus (M.) Treatise on the Teeth of Wheels, demonstrating the best forms which can be given to them for the purposes of Machinery, such as Mill-work and Clock-work, and the art of finding their numbers, translated from the French, third edition, carefully revised and enlarged, with details of the present practice of Millwrights, Engine Makers, and other Machinists, by Isaac Hawkins, *illustrated by 18 plates*, 8vo, cloth

5 0

**Torpedo Warfare.**

A Treatise on Coast Defence; based on the experience gained by Officers of the Corps of Engineers of the Army of the Confederate States, and compiled from Official Reports of Officers of the Navy of the United States, made during the North American War from 1861 to 1865, by Von Scheliha, Lieutenant-Colonel and Chief Engineer of the Department of the Gulf of Mexico, of the Army of the late Confederate States of America; *with numerous fine plates*, imperial 8vo, elegantly bound in cloth, top edge gilt  
Or with the plates coloured

15 0  
30 0**Trevithick.**

The Life of Richard Trevithick (Inventor of the High-pressure Steam-engine), with an account of his Inventions, by Francis Trevithick, C.E., 2 vols, medium 8vo, cloth, *illustrated by a steel portrait, lithographs, and numerous beautiful wood engravings, including many accurate illustrations of Cornwall, its Mines, and Mining Machinery*

£1 16 0

**Turbine.**

A Practical Treatise on the Construction of Horizontal and Vertical Water-Wheels, *with 11 plates*, specially designed for the use of operative mechanics, by William Cullen, Millwright and Engineer, second edition, revised and enlarged, small 4to, cloth

12 6

**Turning.**

The Practice of Hand-turning in Wood, Ivory, Shell, etc., with Instructions for Turning such work in Metal as may be required in the Practice of Turning in Wood, Ivory, etc., also an Appendix on Ornamental Turning, by Francis Campin, second edition, *with wood engravings*, crown 8vo, cloth (a book for beginners)

6 0

**Torpedo Warfare.**

Instructions for the Management of Harvey's Sea Torpedo, *illustrated with plates and numerous wood engravings*, 8vo, cloth

2 6

**Valve-Gears.**

Treatise on Valve-Gears, with special consideration of the Link-Motions of Locomotive Engines, by Dr. Gustav Zeuner, third edition, revised and enlarged, translated from the German, with the special permission of the author, by Moritz Muller, *plates*, 8vo, cloth

12 6

**CONTENTS :***First Part.—Valve-Gears with One Slide-Valve.**First Division.—Simple Valve-Gear with Fixed Expansion.*

- CHAP. I.—Description of the simple Valve-Gear with Hollowed Slide-Valve. Theory of the Valve-Motion in the simple Slide-Valve Gear. Practical Application of the Diagram. Solutions of a few Problems. Practical Notes on the designing of Valve-Gears.
- CHAP. II.—On the "Missing Quantity" in the Formula of the simple Valve-Motion. Representation of the Distribution of the Steam by means of Valve-Ellipses. The Diagram by Reuleaux. The Diagram by Muller.

*Second Division.—Reversing Motion with Variable Expansion. (Link-Motions.)*

- CHAP. I.—Link-Motion by Stephenson. Description of the Link-Motion. Theory of Stephenson's Link-Motion :—*a*. Determination of the Travel of the Slide-Valve ; *b*. On the Curve of Centres ; *c*. On the Suspension of the Link. Practical Application of the Diagram. On the "Missing Quantity."
- CHAP. II.—Link-Motion by Gooch. Description of the Valve-Motion. Theory of the Link-Motion by Gooch :—*a*. Determination of the Travel of the Valve ; *b*. On the Curve of Centres ; *c*. On the Suspension of the Link and of the Radius-rod. Practical Application of the Diagram.
- CHAP. III.—Link-Motion by Allan. Description of the Link-Motion. Theory of Allan's Link-Motion :—*a*. Determination of the Travel of the Valve ; *b*. On the Curve of Centres ; *c*. On the Suspension of the Link and of the Radius-rod. Practical Application of the Diagram.
- CHAP. IV.—Link-Motion by Heusinger von Waldegg. Description of the Link-Motion. Theory of Heusinger von Waldegg's Link-Motion :—*a*. Determination of the Travel of the Valve ; *b*. On the Curve of Centres. Practical Application of the Diagram.
- CHAP. V.—Link-Motion by Pius Fink. Description of the Link-Motion. Theory of Fink's Link-Motion : *a*. Determination of the Travel of the Valve ; *b*. On the Curve of Centres ; *c*. On the Suspension of the Link and of the Radius-rod. Practical Application of the Diagram.

APPENDIX TO FIRST PART.—On the Counter-effect of the Steam in Engines with Reversing Gear.

*Second Part.—Valve-Motions with Two Valves.*

- CHAP. I.—Valve-Motion by Gonzenbach. Description of the Valve-Motion. Theory and Application of the Diagram.
- CHAP. II.—Valve-Motion by Meyer. Description of the Valve-Motion. Theory and Application of the Diagram.
- CHAP. III.—Valve-Motion by Polonceau. Description of the Valve-Motion. Theory and Application of the Diagram.

**WORKS ON LINK-MOTIONS.****Ventilation.**

Ventilation of Buildings, by W. F. Butler, *cuts*, 8vo, sewed

I 0

**Ventilation.**

Health and Comfort in House Building, or Ventilation with Warm Air by Self-Acting Suction Power, with Review of the mode of Calculating the Draught in Hot-Air Flues, and with some actual Experiments, by J. Drysdale, M.D., and J. W. Hayward, M.D., demy 8vo, with plates, cloth

7 6

**Wage Table.**

Delany and Oke's Wage Table for Engineers, Ship-Builders, Contractors, Builders, etc., from one quarter of an hour in regular progression to nine and three-quarter hours, from one day to ten days, at one shilling to eight shillings a day, on a sheet

1 0

**Wage Tables.**

Tables for Workmen's Wages, containing upwards of 7000 Calculations, carefully corrected, and simply arranged, for the use of Masters, Workmen, and others, by Henry Laxton, C.E., 4to, cloth  
Or sewed

2 6  
1 0**CONTENTS :**

Table 1 shows at any price per day, the amount of wages per week, month, year, etc.

Table 2 shows at any price per year, the amount of wages or rent per quarter, month, day, etc.

Table 3 shows at any price per hour, the amount of wages for any number of hours.

Table 4 shows at any price per day, the amount of wages for any number of days, quarters, or hours, etc.

**Watchwork.**

Treatise on Watchwork, Past and Present, by the Rev. H. L. Nelthropp, M.A., F.S.A., numerous illustrations, crown 8vo, cloth,

6 6

**CONTENTS :**

Definitions of words and terms used in watchwork. Tools. Time. Historical summary. On calculations of the numbers for wheels and pinions, their proportional sizes, trains, etc. Of dial-wheels, or motion-work. Length of time of going without winding-up. The Verge. The Horizontal. The Duplex. The Lever. The Chronometer. Repeating Watches. Keyless Watches. The Pendulum, or Spiral Spring. Compensation. Jewelling of pivot-holes. Clerkenwell. Fallacies of the Trade. Incapacity of Workmen. How to choose and use a Watch, etc.

**Water Supply.**

A New Idea for the Water Supply of Towns, and also the Troops in India and the Colonies, etc., etc., by Arthur Sydney Ormsbey, C.E., plates, 8vo, sewed

1 0

JUST PUBLISHED.

# WORKSHOP RECEIPTS,

FOR THE USE OF

Manufacturers, Mechanics, & Scientific Amateurs.

BY ERNEST SPON.

---

CONTAINING RECEIPTS FOR

Bookbinding.	Engraving on Wood, Copper,
Bronzes and Bronzing.	Gold, Silver, Steel, and
Candles.	Stone.
Cement.	Etching and Aqua Tint.
Cleaning.	Firework Making — (Rockets,
Colourwashing.	Stars, Rains, Gerbes, Jets,
Concretes.	Tourbillons, Candles, Fires,
Dipping Acids.	Lances, Lights, Wheels, Fire-
Drawing Office Details.	balloons, and minor Fire-
Drying Oils.	works.)
Dyeing.	Fluxes.
Dynamite.	Foundry Mixtures.
Electro-Metallurgy — (Cleaning,	Freezing.
Dipping, Scratch-brushing,	Fulminates.
Batteries, Baths, and Deposits	Furniture Creams, Oils, Polishes,
of every description).	Lacquers, and Pastes.
Enamels.	Gilding.

# RECEIPTS—continued.

Glass Making.	Painting in Oils, in Water
Glass Cutting, Cleaning, Frost-	Colours, as well as Fresco,
ing, Drilling, Darkening,	House, Transparency, Sign,
Bending, Staining, and	and Carriage Painting.
Painting.	Pigments.
Gold.	Photography.
Glues.	Plastering.
Graining.	Pottery—(Clays, Bodies, Glazes,
Gums.	Colours, Oils, Stains, Fluxes,
Gun Cotton.	Enamels, and Lustres).
Gunpowder.	Polishes.
Horn Working.	Scouring.
India-rubber.	Silvering.
Ink—(Writing and Printing).	Soap.
Japans, Japanning, and kindred	Solders.
processes.	Tanning.
Lacquers.	Taxidermy.
Lathing.	Tempering Metals.
Leather.	Treating Horn, Mother o' Pearl,
Lubricants.	and like substances.
Matches.	Varnishes, Manufacture and
Marble Working.	Use of.
Mortars.	Veneering.
Nitro-Glycerine.	Washing.
Oils.	Waterproofing.
Paper.	Welding.
Paper Hanging.	Whitewashing.

Besides Receipts relating to the lesser Technological matters and processes, such as the manufacture and use of Stencil Plates, Blacking, Crayons, Paste, Putty, Wax, Size, Alloys, Catgut, Tun-bridge Ware, Picture Frame and Architectural Mouldings, Compos, Camcos, and others too numerous to mention.

**Water Supply.**

The Brooklyn Water Works, a descriptive Memoir, containing descriptions of the Supply Ponds, Conduit, Engine Houses and Engines, Force Mains, Reservoirs, Pipe Distribution, Drainage Grounds and Sewerage Works, used by those Works, with Tables of Rainfall Statistics, of Water Supply, etc., *illustrated by 59 plates*, royal 4to, cloth

£3 10 0

**Water Supply.**

Facts and Fallacies, discussed in a Series of Letters, written for, and published in the 'Courier' Newspaper, between Nov. 1866, and April, 1867, chiefly with reference to Constant Service, and a Future Source of Supply, by John Taylor, C.E., 8vo, sewed

1 0

**Weight of Iron.**

Tabulated Weights of Angle, T, Bulb, and Flat Iron, for the use of Naval Architects and Ship-builders, by Charles H. Jordan, M.I.N.A., 18mo, sewed

1 6

"Although this little ready calculator has been professedly compiled for the use of naval architects and ship-builders, and contains in a cleverly compressed form much that cannot fail to be appreciated by *them* both as regards the saving of time in preparing elaborate estimates and the insuring of correctness of results, it must not be supposed that these branches are the *only ones* in which the information it affords will be welcomed. The numerous tables give at a single reference the weight per foot of nearly every imaginable size and shape of iron, and it needs no argument of ours to convince any of those who are engaged in constructive iron-work of the great value of so handy and reliable a little key to their calculations. Its price is not equal to a tithe of the labour of a single computation."—*The Ironmonger's Journal*, August 15th, 1870.

**Wood-working Machines.**

A Treatise on the Construction and Operation of Wood-working Machines, including a History of the Origin and Progress and Manufacture of Wood-working Machinery, by J. Richards, Mechanical Engineer, *25 folding plates, and nearly 100 full-page illustrations* of English, French, and American Wood-working Machines in modern use, selected from the designs of prominent Engineers, 4to, cloth

£1 5 0

**Wood-working Factories.**

On the Arrangement, Care, and Operation of Wood-working Factories and Machinery, forming a complete Operator's Handbook, by J. Richards, Mechanical Engineer, *woodcuts*, crown 8vo, cloth

5 0

**Yachts.**

Yachts and Yacht-Building, being a Treatise on the construction of Yachts and other matters relating to Yachting, by P. R. Maret, second edition, enlarged, *illustrated with 12 folding plates*, demy 8vo, cloth

12 6
